

00711100 PLUNGER SWITCHES

12V/24V • “Superseal” Type • 1,5 series • Normally Open Mechanical

00711100

interchangeable with IVECO 98429631

00711200

interchangeable with IVECO 4858212

00711300

interchangeable with IVECO 4862580

00711400

interchangeable with IVECO 4862212

00711900

interchangeable with IVECO 99437106

00712000

interchangeable with IVECO 99445107

00711700

interchangeable with IVECO 50302971

00713000

Description

The mechanical switches signal many different situations that may occur on commercial vehicles: differential lock, low gears activation, handbrake failure, etc. Mechanical switches both with 12V and with 24V; available are versions with contacts normally open or contacts normally closed, and black seal connector IP 67/CEI EN 60529.

Features and Benefits

- All the mechanical switches function both with 12V and with 24V
- Black seal connector IP 67/CEI EN 60529.
- Some versions are suitable for use under pressure conditions
- Silver plated contacts
- The superseal connector is protected with a rubber cap to prevent dirt intrusion before mounting

Specifications Overview

Voltage: 12V/24V

Ingress Protection: IP69K

Applications

- IVECO Eurocargo
- IVECO Daily
