MicroStrips with Solid Wire

These .050" pitch single row microstrips are factory-crimped to gold-plated single strand copper wire. Available with 1 to 30 contacts. Can be used for PCB header. Solder-dipped versions have 63/37 tin-lead solder. Optional latching mechanism provides secure connection. Guide pins provide circuit polarization. Contacts are twistpin type and are gold-plated. Housing is molded LCP thermoplastic. Suitable for high-reliability applications where long-term resistance to fretting corrosion is a necessity. 3 A., 600 Vac, -55C to +150C.

Center Latch Locations

Even Number of Cavities

Latch placed on next lower cavity prior to centerline.
 Latch position = (# of Cavities) $\div$ 2.

Odd Number of Cavities

Latch placed in cavity on centerline.
 Latch Position = (# of Cavities+1) $\div$ 2.
