Fit Testing Materials

Issue Date 01/01/04

3M equipment and procedures provide a simple, direct way to meet OSHA qualitative fit testing requirements. Our products can be used with any particulate or gas/vapor respirator with a particulate prefilter to test face-to-respirator seal. The equipment helps satisfy respiratory program requirements, and is easy to use during respiratory training.

The fit test works by spraying a sweet or bitter solution into the hood environment. If the wearer does not detect the test agent's taste, an acceptable fit has been demonstrated.

3M™ Fit Testing Materials can help you meet OSHA requirements

Features/Benefits

- Fast, easy method for performing qualitative fit testing.
- Can be used with any particulate respirator or any gas/vapor respirator with a particulate prefilter.
- Helps satisfy respiratory program requirements.
- Can be used during respirator training programs.
- Convenient, reliable, and economical to use.
- Permits exercises to be performed in a test atmosphere.
- Determines employee's taste threshold to fit test solution.

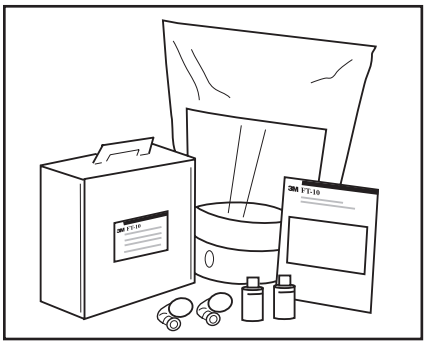

Respiratory Seminars

3M offers a comprehensive selection of seminars designed to fully acquaint the respiratory product user with the applicable regulations.

All seminars qualify for Continuing Education Units as well as various professional association credits. For a seminar calendar, call 1-800-659-0151, ext. 275.

3M™ Fit Testing Materials

3M™ Fit Test Kits
