

Series 801 Cordsets For Harsh Environments

Overmolded Cordset

Glenair's "Mighty Mouse" overmolded cordsets offer watertight sealing and excellent cold temperature flexibility. These cables are 100% tested and ready to use. Standard overmolded cables feature polyurethane jackets with flexible strain reliefs.

Two Jacket Types – standard extruded Estane polyurethane jacket resists abrasion and chemicals. Or choose low smoke / zero halogen polyurethane jackets for compliance with low toxicity regulations.

Shielded – These cables feature 90% tinned copper braid coverage. Shields are terminated directly to connectors with **BAND-IT®** straps.

Simplified Ordering, No Minimums
ASAP cordsets are made-to-order from stocked connectors and cable. Choose #22 or #24 AWG cable with standard Estane jacket for best availability.
