

Features & Benefits

- Fully compatible with IBM ESCON* architecture
- Positive latching mechanism
- Self aligning and free floating ferrule design
- Zirconia ceramic ferrules - Pre-radiused and pre-polished
- Polarized housing with retractable shroud
- Low insertion loss: < .15 dB TYP

Applications

- Fiber optic link IBM ESCON networks
- Peripheral control units
- Storage devices
- Processors
- Workstations

The Enterprise Systems CONNECTION (ESCON) architecture was developed for high speed communication between mainframes and storage devices, peripheral control units, cluster controllers and other networks. Molex's ESCON series of connectors are fully compatible with the requirements of this architecture.

The connector is designed using the latest engineered polymer and ceramic materials featuring pre-radiused and pre-polished zirconia ceramic PC ferrules and a rugged polymer housing with a retractable shroud. Molex's unique termination process and the factory polished and radiused ferrules combine to produce quick and consistent ESCON terminations.

Adapters are available in either flange or snap-in mounting styles. Precision zirconia ceramic or polymer alignment sleeves can be provided with either mounting style.

*ESCON is a registered trademark of International Business Machines Corporation.

Insertion Loss Performance
(MM enhanced ferrule, 62.5/125 μ m fiber)

Performance and Specifications

Characteristics	Units	Min.	Typ.	Max.	Comments
Durability	~dB	-	-	0.07	FOTP-21, 100 mate/unmate cycles
Humidity Cycling	~dB	-	-	0.13	FOTP-5, type 1A, +60°C at 95% RH for 240 hours
Temperature Cycling	~dB	-	-	0.21	FOTP-3, modified to 2500 cycles 10°C to 60°C, max ramp, zero dwell time
Cable Retention	~dB	-	-	0.16	FOTP-6, modified to 8 cycles at 1 m and 3 m 133 N ramp and hold 5 seconds
Coupling Strength/Axial Pull	~dB	-	-	0.04	FOTP-185, 20 lb., hold 30 seconds
Impact	~dB	-	-	0.05	FOTP-2A, 8 cycles
Flex	~dB	-	-	0.05	FOTP-1, 1 lb. +/- 45°, 300 times
Twist	~dB	-	-	0.10	FOTP-36A, 10 lb. at 0.1 m +/- 180°
Vibration	~dB	-	-	0.11	FOTP-11, 10 to 55 Hz, 2 hours per axis
Insertion/Withdrawl force	lb				5.3 Insertion 0.6 Withdrawl
