

AD-DPGIOZ Data Pattern Generator/Receiver

Features

- Ordering Code: AD-DPGIOZ
- Compatibility: The DPGI/O is compatible with the AD9963-EBZ and AD9961-EBZ evaluation boards.
- Software can be downloaded from the DPG Site.
- DPG Questions/Support

Product Details

- The DPGI/O provides pattern generation and receiving capabilities to compliment several evaluation boards from Analog Devices. The DPGI/O connects to a PC over USB, and allows a user to download a vector from their PC into the DPGI/O's internal memory, or to receive a vector from an evaluation board and transfer it to the PC.
- Analog Devices' pattern generator/receivers and evaluation boards are designed and sold solely to support an efficient and thorough means by which to evaluate Analog Devices components in a lab environment for a wide range of end applications. Any application or use of the pattern generators and/or evaluation boards, other than specified above, will not be supported.
