

## Specification for LCD Module

**AMC1602GR-B-Y6NFDY**

Revision A

|      |                                                                  |
|------|------------------------------------------------------------------|
| AM   | Orient Display                                                   |
| C    | Character Type                                                   |
| 1602 | 16 Characters x 2 lines                                          |
| G    | Serial G, Module Dimension 84.0 x 44.0 x 14.0 (max)              |
| R    | RoHS Compliant                                                   |
| B    | COB Type                                                         |
| Y    | STN Positive Mode<br>(Dark Character on Yellow Green Background) |
| 6    | 6 o'clock Viewing Direction                                      |
| N    | Top: -20~70°C; Tstr: -30~+80°C                                   |
| F    | Transflective                                                    |
| D    | LED Backlight                                                    |
| Y    | Yellow-Green Backlight                                           |
| /    | Controller S6A0069 or equivalent                                 |
| /    | Parallel Interface                                               |

## DOCUMENT REVISION HISTORY:

| DATE    | PAGE | DESCRIPTION                   |
|---------|------|-------------------------------|
| 1999.8. | -    | First release                 |
| 2005.3. | -    | Modify the full specification |
| 2005.12 | 4    | Update the part number system |

# **Contents**

1. Module Classification Information
2. Precautions in use of LCD Modules
3. General Specification
4. Absolute Maximum Ratings
5. Electrical Characteristics

## **2. Precautions in use of LCD Modules**

- (1) Avoid applying excessive shocks to the module or making any alterations or modifications to it.
- (2) Don't make extra holes on the printed circuit board, modify its shape or change the components of LCD module.
- (3) Don't disassemble the LCM.
- (4) Don't operate it above the absolute maximum rating.
- (5) Don't drop, bend or twist LCM.
- (6) Soldering: only to the I/O terminals.
- (7) Storage: please storage in anti-static electricity container and clean environment.

## **3. General Specification**

| Item                                  | Dimension                | Unit |
|---------------------------------------|--------------------------|------|
| Number of Characters                  | 16 characters x 2 Lines  | —    |
| Module dimension(No Backlight )       | 84.0 x 44.0 x 10.0 (MAX) | mm   |
| Module dimension(With LED Backlight ) | 84.0 x 44.0 x 14.0 (MAX) | mm   |
| View area                             | 64.5 x 15.5              | mm   |
| Active area                           | 56.20 x 11.50            | mm   |
| Dot size                              | 0.55x 0.65               | mm   |
| Dot pitch                             | 0.60 x 0.70              | mm   |
| Character size                        | 2.95 x 5.55              | mm   |
| Character pitch                       | 3.55 5.59                | mm   |
| LCD type                              | STN                      |      |
| Duty                                  | 1/16                     |      |
| View direction                        | 6 o'clock or 12 o'clock  |      |
| Backlight Type                        | None, YELLOW-GREEN       |      |

## 4. Absolute Maximum Ratings

| Item                     |                 | Symbol          | Min           | Max          | Unit |
|--------------------------|-----------------|-----------------|---------------|--------------|------|
| Input Voltage            |                 | $V_I$           | -0.3          | $V_{DD}+0.3$ | V    |
| Supply Voltage For Logic |                 | $V_{DD}-V_{SS}$ | -0.3          | 7.0          | V    |
| Supply Voltage For LCD   |                 | $V_{DD}-V_0$    | $V_{dd}-13.5$ | 0            | V    |
| Standard                 | Operating Temp. | Top             | -20           | 70           | °C   |
| Temperature LCM          | Storage Temp.   | Tstr            | -30           | 80           | °C   |
| Wide Temperature         | Operating Temp. | Top             | -20           | 70           | °C   |
| LCM                      | Storage Temp.   | Tstr            | -30           | 80           | °C   |

## 5. Electrical Characteristics

| Item                                     | Symbol          | Condition                                             | Min          | Typ | Max          | Unit |
|------------------------------------------|-----------------|-------------------------------------------------------|--------------|-----|--------------|------|
| Supply Voltage For Logic                 | $V_{DD}-V_{SS}$ | —                                                     | 4.5          | 5.0 | 5.5          | V    |
| Supply Voltage For LCD                   | $V_{DD}-V_0$    | $T_a=25^{\circ}\text{C}$                              | 4.5          | 5.0 | 5.5          | V    |
| Input High Volt.                         | $V_{IH}$        | —                                                     | $0.7 V_{DD}$ | —   | $V_{DD}$     | V    |
| Input Low Volt.                          | $V_{IL}$        | —                                                     | $V_{SS}$     | —   | $0.3 V_{DD}$ | V    |
| Supply Current                           | $I_{DD}$        | $V_{DD}=5\text{V}$                                    | 0.8          | 1.2 | 1.5          | mA   |
| Supply Voltage of Yellow-green backlight | $V_{LED}$       | Forward current =120 mA<br>Number of LED die 2x12= 24 | 3.8          | 4.1 | 4.3          | V    |

## 6. Optical Characteristics

| Item           | Symbol       | Condition   | Min | Typ | Max | Unit |
|----------------|--------------|-------------|-----|-----|-----|------|
| View Angle     | (V) $\theta$ | $CR \geq 2$ | -20 | —   | 35  | deg  |
|                | (H) $\phi$   | $CR \geq 2$ | -30 | —   | 30  | deg  |
| Contrast Ratio | CR           | —           | —   | 3   | —   | —    |
| Response Time  | T rise       | —           | —   | —   | 250 | ms   |
|                | T fall       | —           | —   | —   | 250 | ms   |

### Definition of Operation Voltage (Vop)

### Definition of Response Time (Tr , Tf)

### Conditions :

Operating Voltage : Vop      Viewing Angle( $\theta$  ,  $\phi$ ) :  $0^\circ$  ,  $0^\circ$   
 Frame Frequency : 64 HZ      Driving Waveform : 1/N duty , 1/a bias

### Definition of viewing angle( $CR \geq 2$ )

## **7. Interface Pin Function**

| Pin No. | Symbol          | Level      | Description                              |
|---------|-----------------|------------|------------------------------------------|
| 1       | V <sub>SS</sub> | 0V         | Ground                                   |
| 2       | V <sub>DD</sub> | 5.0V       | Supply Voltage for logic                 |
| 3       | V <sub>0</sub>  | (Variable) | Operating voltage for LCD                |
| 4       | RS              | H/L        | H: DATA, L: Instruction code             |
| 5       | R/W             | H/L        | H: Read(MPU→Module) L: Write(MPU→Module) |
| 6       | E               | H,H→L      | Chip enable signal                       |
| 7       | DB0             | H/L        | Data bit 0                               |
| 8       | DB1             | H/L        | Data bit 1                               |
| 9       | DB2             | H/L        | Data bit 2                               |
| 10      | DB3             | H/L        | Data bit 3                               |
| 11      | DB4             | H/L        | Data bit 4                               |
| 12      | DB5             | H/L        | Data bit 5                               |

## 8. POWER SUPPLY

### SINGLE SUPPLY VOLTAGE TYPE

Vdd-V0: LCD Driving Voltage  
VR: 10K - 20K

### DUAL SUPPLY VOLTAGE TYPE

Vdd-V0: LCD Driving Voltage  
VR: 10K - 20K

## 9. Contour Drawing & Block Diagram

## 10. Function Description

The LCD display Module is built in a LSI controller, the controller has two 8-bit registers, an instruction register (IR) and a data register (DR).

The IR stores instruction codes, such as display clear and cursor shift, and address information for display data RAM (DDRAM) and character generator (CGRAM). The IR can only be written from the MPU. The DR temporarily stores data to be written or read from DDRAM or CGRAM. When address information is written into the IR, then data is stored into the DR from DDRAM or CGRAM. By the register selector (RS) signal, these two registers can be selected.

| RS | R/W | Operation                                               |
|----|-----|---------------------------------------------------------|
| 0  | 0   | IR write as an internal operation (display clear, etc.) |
| 0  | 1   | Read busy flag (DB7) and address counter (DB0 to DB7)   |
| 1  | 0   | Write data to DDRAM or CGRAM (DR to DDRAM or CGRAM)     |
| 1  | 1   | Read data from DDRAM or CGRAM (DDRAM or CGRAM to DR)    |

### Busy Flag (BF)

When the busy flag is 1, the controller LSI is in the internal operation mode, and the next instruction will not be accepted. When RS=0 and R/W=1, the busy flag is output to DB7. The next instruction must be written after ensuring that the busy flag is 0.

### Address Counter (AC)

The address counter (AC) assigns addresses to both DDRAM and CGRAM

### Display Data RAM (DDRAM)

This DDRAM is used to store the display data represented in 8-bit character codes. Its extended capacity is 80×8 bits or 80 characters. Below figure is the relationships between DDRAM addresses and positions on the liquid crystal display.

### Display position DDRAM address

|    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|
| 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 | 11 | 12 | 13 | 14 | 15 | 16 |

2-Line by 16-Character Display

### Character Generator ROM (CGROM)

The CGROM generate 5×8 dot or 5×10 dot character patterns from 8-bit character codes. See Table 2.

### Character Generator RAM (CGRAM)

In CGRAM, the user can rewrite character by program. For 5×8 dots, eight character patterns can be written, and for 5×10 dots, four character patterns can be written.

Write into DDRAM the character code at the addresses shown as the left column of table 1. To show the character patterns stored in CGRAM.

## Relationship between CGRAM Addresses, Character Codes (DDRAM) and Character patterns

**Table 1.**

For 5 \* 8 dot character patterns

| Character Codes<br>( DDRAM data ) |   |   |   |     |   |   |   | CGRAM Address |  |  |     |   |   | Character Patterns<br>( CGRAM data ) |  |  |   |           |  |   |  |  |   |  |  |
|-----------------------------------|---|---|---|-----|---|---|---|---------------|--|--|-----|---|---|--------------------------------------|--|--|---|-----------|--|---|--|--|---|--|--|

  |     |   |   | Character Patterns<br>( CGRAM data )                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 6 | 5 | 4 | 3   | 2 | 1 | 0 |

 ## 13. Timing Characteristics

### 13.1 Write Operation

$T_a=25^{\circ}\text{C}$ ,  $V_{DD}=5.0\pm 0.5\text{V}$

| Item                               | Symbol           | Min  | Typ | Max | Unit |
|------------------------------------|------------------|------|-----|-----|------|
| Enable cycle time                  | $t_{cycE}$       | 1200 | —   | —   | ns   |
| Enable pulse width (high level)    | $PW_{EH}$        | 140  | —   | —   | ns   |
| Enable rise/fall time              | $t_{Er}, t_{Ef}$ | —    | —   | 25  | ns   |
| Address set-up time (RS, R/W to E) | $t_{AS}$         | 0    | —   | —   | ns   |
| Address hold time                  | $t_{AH}$         | 10   | —   | —   | ns   |
| Data set-up time                   | $t_{DSW}$        | 40   | —   | —   | ns   |
| Data hold time                     | $t_H$            | 10   | —   | —   | ns   |

## 13.2 Read Operation

NOTE: \*VOL1 is assumed to be 0.8V at 2 MHz operation.

$T_a=25^{\circ}\text{C}$ ,  $V_{DD}=5.0\pm 0.5\text{V}$

| Item                               | Symbol           | Min  | Typ | Max | Unit |
|------------------------------------|------------------|------|-----|-----|------|
| Enable cycle time                  | $t_{cycE}$       | 1200 | —   | —   | ns   |
| Enable pulse width (high level)    | $PW_{EH}$        | 140  | —   | —   | ns   |
| Enable rise/fall time              | $t_{Er}, t_{Ef}$ | —    | —   | 25  | ns   |
| Address set-up time (RS, R/W to E) | $t_{AS}$         | 0    | —   | —   | ns   |
| Address hold time                  | $t_{AH}$         | 10   | —   | —   | ns   |
| Data delay time                    | $t_{DDR}$        | —    | —   | 100 | ns   |
| Data hold time                     | $t_{DHR}$        | 10   | —   | —   | ns   |

### 13.3 Timing Diagram of VDD Against V0.

Power on sequence shall meet the requirement of Figure 4, the timing diagram of VDD against V0.
