

Wire Wound SMD Power Inductors – AMWPH Series

Operating Temp. : -40℃~+125℃ (Including self-heating)

FEATURES

- High saturation current, low DC resistance
- Excellent temperature stability
- High reliability,
- AEC-Q200 verified

APPLICATIONS

- Infotainment system
- LED lighting
- Airbag
- Power supply system except for power engineer chassis and safety system

Note:

- ※1 : Rated current: Isat or Irms, whichever is smaller.
- ※2 : Saturation Current : DC current at which the inductance drops approximate 30% from its value without current.
- ※3 : Heat Rating Current: DC current that causes the temperature rise ($\Delta T=40^{\circ}\text{C}$) from 20°C ambient;
The part temperature (ambient + temp. rise) should not exceed 125°C under worst case operating conditions.
Circuit design, component placement, PCB trace size and thickness, airflow and other cooling provisions all affect the part temperature. Part temperature should be verified in the end application
