

# BAV199LT1G

## Dual Series Switching Diode

### Features

- Low Leakage Current Applications
- Medium Speed Switching Times
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

### MAXIMUM RATINGS

| Rating                                                                                | Symbol          | Value             | Unit |
|---------------------------------------------------------------------------------------|-----------------|-------------------|------|
| Reverse Voltage                                                                       | $V_R$           | 70                | Vdc  |
| Forward Current                                                                       | $I_F$           | 215               | mAdc |
| Peak Forward Surge Current                                                            | $I_{FM(surge)}$ | 500               | mAdc |
| Repetitive Peak Reverse Voltage                                                       | $V_{RRM}$       | 70                | Vdc  |
| Average Rectified Forward Current<br>(Note 1)<br>(Averaged Over Any 20 ms Period)     | $I_{F(AV)}$     | 715               | mAdc |
| Repetitive Peak Forward Current                                                       | $I_{FRM}$       | 450               | mAdc |
| Non-Repetitive Peak Forward Current<br>$t = 1.0 \mu s$<br>$t = 1.0 ms$<br>$t = 1.0 s$ | $I_{FSM}$       | 2.0<br>1.0<br>0.5 | Adc  |

### THERMAL CHARACTERISTICS

| Characteristic                                                                                          | Symbol          | Max         | Unit                 |
|---------------------------------------------------------------------------------------------------------|-----------------|-------------|----------------------|
| Total Device Dissipation<br>FR-5 Board (Note 1), $T_A = 25^\circ C$<br>Derate above $25^\circ C$        | $P_D$           | 225<br>1.8  | mW<br>mW/ $^\circ C$ |
| Thermal Resistance, Junction-to-Ambient                                                                 | $R_{\theta JA}$ | 556         | $^\circ C/W$         |
| Total Device Dissipation<br>Alumina Substrate (Note 2), $T_A = 25^\circ C$<br>Derate above $25^\circ C$ | $P_D$           | 300<br>2.4  | mW<br>mW/ $^\circ C$ |
| Thermal Resistance, Junction-to-Ambient                                                                 | $R_{\theta JA}$ | 417         | $^\circ C/W$         |
| Junction and Storage Temperature                                                                        | $T_J, T_{stg}$  | -65 to +150 | $^\circ C$           |

Stresses exceeding Maximum Ratings may damage the device. Maximum Ratings are stress ratings only. Functional operation above the Recommended Operating Conditions is not implied. Extended exposure to stresses above the Recommended Operating Conditions may affect device reliability.

1. FR-5 =  $1.0 \times 0.75 \times 0.062$  in.

2. Alumina =  $0.4 \times 0.3 \times 0.024$  in. 99.5% alumina.
