

DIFFERENTIAL PRESSURE DEVICE
ORIFICE PLATE WITH CARRIER RINGS
DATA SHEET
FVA

This orifice plate is widely used for measuring liquid, steam, and gas in low or medium pressure, lines. Tapping of differential pressure is done by corner tap method with differential pressure tapping rings having CARRIER RINGS. One set is composed of differential pressure tapping rings, an orifice plate, and a gasket. CARRIER RINGS are installed to average the differential pressure inside the rings.

SPECIFICATIONS

Type: Corner taps

Calculation standard:

According to concentric edge
JIS Z 8762-1995 (ISO 5167-1:1991)

Nominal pipe size: 25A to 300A

These orifice plates with CARRIER RINGS can be supplied for nominal pipe sizes up to 1000A. Type FVB orifice plate is recommended for sizes 400A and above.

Materials of main elements:

Ring; SS400, SF440A, SUS304, SUS316 or PVC

Orifice plate; SUS304, SUS316 or PVC

Differential pressure tapping pipe;
STPG370, SUS304 or SUS316

Differential pressure outlet flange;
SS400, SF440A, SUS304 or SUS316

Gasket: Valqua (Refer to table 1)

Mount direction: Horizontal

Vertical (Down to up)

Vertical (Up to down)

Please specify in the specification sheet.

Connection method:

Connection flange;
JIS 5, 10, 20, 30K
ANSI 150, 300, 400Lb

Use single-part orifice plate (type FVE) for flange standard of JIS 40K, ANSI 600Lb or higher.

Operating conditions:

Max. pressure; 3Mpa {30.59kgf/cm²} or less

Temperature range; -10 to 300°C
(depends on the kind of fluid)

Differential pressure outlet size:

R1/2
JIS 15A welded type
Flange standard; JIS 5K 15A RF
JIS 10K 15A RF
JIS 20K 15A RF
JIS 30K 15A RF

<Table 1>

Type	Application	Rating (about)
No. 6500AC (Non-asbestos)	General use	3MPa, 100°C
No. 7020 (Teflon)	For no oil treatment	1.5MPa, 200°C
No. GF300 (Graphite compound)	For high temp. high press. *	3MPa, 230°C
No. 6590T (Pure graphite)	For high temp. high press. *	20MPa, 400°C

*Non-standard

CODE SYMBOLS

Notes:

(1) Combination of orifice plates and rings

		Orifice plate		
		S	W	V
Ring	E	○	○	×
	F	○	○	×
	S	○	○	×
	W	×	○	×
	V	×	○	○

(2) With ring material SS400:

Pressure rating for (pipe) flange $\leq 10K$

Working temperature $\leq 300^{\circ}\text{C}$

(3) With ring material PVC:

Working pressure $\leq 2\text{K}$

Working temperature $\leq 50^{\circ}\text{C}$

(4) Designate material SUS304 or SUS316

(code S or W) for orifice plates and rings

in case of "No oil treatment".

OUTLINE DIAGRAM (Unit: mm)

Horizontal mount.

Notes*:

- (1) ϕd_{20} is orifice diameter at 20°C.
(refer to orifice calculation sheet for details.)
- (2) ϕD_1 is inside diameter of ring.
- (3) Piping with nominal size of more than 250A is not chamfered.
- (4) When differential pressure outlet is flange type, it is necessary to make piping so that outlets are not in same direction.

Vertical mount.

ORDERING INFORMATION

1. Code symbols
2. Kind, composition and density of fluid
3. Temperature, pressure, relative humidity and viscosity (heat insulation index for gas) of fluid
4. Flow rate (maximum, normal, minimum)
5. Instrument scale
6. Inside diameter (measured value) and material of piping
7. Type and maximum differential pressure (for existing instrument) of transmitter to be connected
8. Size of pipe flange for insertion of orifice
9. Permanent pressure loss and other restricted items

(When ordering, please specify the above items in the specification sheet.)

⚠ Caution on Safety

*Before using this product, be sure to read its instruction manual in advance.
