

Ecosine 60 Hz Passive Harmonic Filters

- The industry standard for 6-pulse rectifiers and motor drives
- Excellent behavior under partial load conditions
- Filters for thyristor (SCR) rectifiers

Technical specifications

Nominal operating voltage	3x 380 to 480 VAC ±10%
Operating frequency	60 Hz ±1 Hz
Total harmonic current distortion THID*	<5% @ rated power
Total demand distortion TDD	According to IEEE-519
Nominal motor drive input power rating	5 to 250 HP
Efficiency	98.5 to 99.5% @ nominal line voltage and power
High potential test voltage	P → E 2500 VAC (1 min)
Protection category	IP 20/NEMA 1
Cooling	Internal fan cooling
Overload capability	1.6x rated current for 1 minute, once per hour
Ambient temperature range	–25°C to +50°C fully operational –25°C to +80°C transport and storage +50°C to +55°C derated operation***
Flammability corresponding to	UL 94 V-2 or better
Design corresponding to	UL 508, EN 61558-2-20, CE (LVD 2006/95/EC)
MTBF @ 50°C/460 V (Mil-HB-217F)	200,000 hours
SCCR****	100 kA
Earthing System	TN, TT, IT

* System requirements: THVD <2%, line voltage unbalance <1%

Note: performance specifications in this brochure refer to six-pulse diode rectifiers.

SCR rectifier front-ends will produce different results, dependent upon the firing angle of the thyristors.

** Ecosine filters reduce RMS input and peak current by reducing harmonic currents and improving true power factor.

*** $I_{derated} = I_{nominal} \cdot \sqrt{((T_{max} - T_{amb}) / (T_{max} - T_{nominal}))} = I_{nominal} \cdot \sqrt{((55^{\circ}\text{C} - T_{amb}) / 5^{\circ}\text{C})}$

**** External UL-rated fuses required. Please consult the user manual.

Approvals

Features and benefits

Schaffner ecosine harmonic filters represent an economical solution to the challenge of load-applied harmonics mitigation in three-phase power systems. With a plug-and-play approach and more compact dimensions than comparable products, they can be quickly installed and easily commissioned. They increase the reliability and service life of electric installations, help utilize electric system capacity better, and are the key to meet Power Quality standards such as IEEE-519. Ecosine filters calm your harmonic waves. Schaffner ecosine filters can be applied to virtually any kind of power electronics with front-end six-pulse rectifiers, where harmonic current distortion needs to be reduced to defined limits. Typical applications, where the above-mentioned non-sinusoidal consumers of power can account for a significant portion of the load, include:

Typical applications

- Equipment with front-end six-pulse rectifier
- Motor drives
- Factory automation equipment
- Water/wastewater treatment facilities
- Fan and pump applications
- HVAC installations
- Mission-critical processes
- DC fast chargers

Typical electrical schematic

FN 3413-310-99	250	932		-99	-35	202	803570

* Filter to be selected by system voltage and load (motor drive) power. Note: the harmonic filter will reduce the RMS input current. Example: the rated RMS input current of an unfiltered 460 V/20 HP/28 A drive will be reduced to approximately 20 A. Therefore, filter selection by current rating, as it is common for EMC/EMI filters, is not suitable.

** Calculated power loss at rated load power.

*** Please contact your local Schaffner partner to order the optional NEMA 1 covers with the order code in the table above.

Mechanical data

FN 3413-240 and -310

Installation. All filters from FN 3413-8 to -130 are wall mountable and have to be operated vertically. The filters FN 3413-150 and higher are designed for floor mounting. In order to allow for sufficient air flow all filters must be clear on top and bottom min. 150 mm.

Optional NEMA 1 cover. All filters can be optionally fitted with a NEMA 1 cover. Please find order codes on previous pages.
