FunctionMAX

High-speed transmission 0.5mm pitch Board-to-Board connection floating connectors

FX23/FX23L Series

Features

1. 0.5mm pitch
2. Stacking (Height : 8 - 30mm)/vertical
3. Contacts available : 20/40/60/80/100/120 for signal + 4 for power source
4. Floating movable amount : X direction : ±0.6mm ; Y direction: ±0.6mm
   A floating movement above the connector pitch is possible. (Fig.1)
5. High-speed transmission (8+ Gbps)
6. Hybrid power design (3A/pin×4 lines)
   The guide posts on both sides of the connector are equipped with 4 lines of power contacts in addition to the signal contact. (Fig.2)
7. Current capacity : Signal contact 0.5A/pin, power contact 3A/pin
8. Available for automatic mounting (absorption tape is attached as standard equipment)
9. Excellent mating performance due to the large guide post.

Floating ability : XY-axis±0.6mm

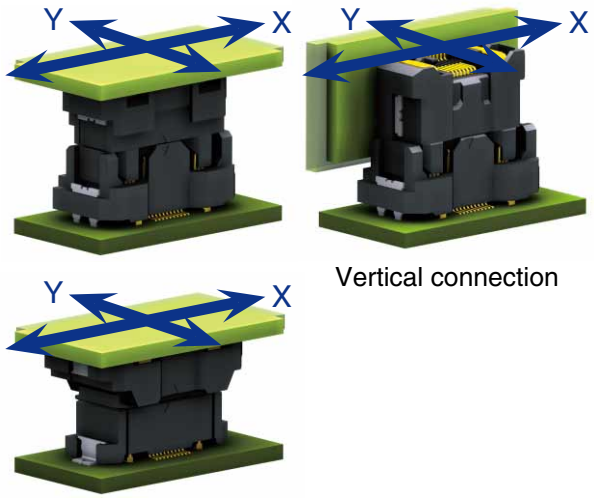

Fig.1

Signal integrity

● **ICR (Insertion-loss-to-Crosstalk-Ratio)**
The ICR containing cross-talk from 5 adjacent differential pairs provides adequate margin in comparison with the criteria based on the specification of IEEE802.3ap.

● **Differential impedance**
Differential impedance is 100±10Ω at the rise time of 87.5ps (20 to 80%).

Hybrid Power/Signal contacts

■Product Specifications

Ratings	Rated current : Signal part 0.5A Power part 3.0A	Operating temperature range : -55 to 105℃ (Note 1)
		Storage temperature range : -10 to 60℃ (Note 2)
	Rated voltage : Signal part AC 50V Power part AC 200V	Operating/storage humidity range : 90% or less relative humidity (No dew condensation is allowed)

Items	Specifications	Conditions
1. Contact resistance	Signal part 70mΩ or less Power part 20mΩ or less	Measured at 100mA
2. Insulation resistance	Signal part 100MΩ or more Power part 1,000MΩ or more	Signal part Measured at DC Signal Measured at DC 100V Power Measured at DC 250V
3. Withstanding Voltage	No flashover or breakdown.	Signal contacts Energized at AC 150V for 1 minute Power contacts Energized at AC 600V for 1 minute
4. Mating durability	Contact resistance of the signal part 80mΩ or less Power part 30mΩ or less.	100 times insertion/withdrawal
5. Vibration proof	No electric outage of 1μ or greater.	Frequency 10 - 55Hz, half amplitude 0.75mm, 10 cycles in each of the 3-axis directions each for 5 minutes per cycle
6. Shock resistance	No electric outage of 1μ or greater.	Acceleration of 490m/s^2; duration 11ms, sine half-wave, 3 cycles in each of the 3 axes each in both directions.
7. Moisture resistance	Contact resistance of the signal part 80mΩ or less Power part 30mΩ or less Insulation resistance at the signal part 100MΩ or more Power part 1,000MΩ or more.	Left to stand for 96 hours at the temperature of 40℃ and the humidity of 90 to 95%
8. Temperature cycle	Contact resistance of the signal part 80mΩ or less Power part 30mΩ or less Insulation resistance at the signal part 100MΩ or more Power part 1,000MΩ or more.	Temperature -55 → 85℃ 5 cycles for a series of time periods : 30 minutes → 30 minutes

Note 1 : Includes temperature rise caused by current flow.
Note 2 : The term “storage” refers to the long-term storage condition of unused products before mounting on PCB.

■Materials / Finish

Part	Materials		Finish	UL standard
Insulator (FX23)	Header	Polyamide resin	Black color	UL94V-0
	Receptacle	LCP resin		
Insulator (FX23L)	Header	Polyamide resin	Black color	UL94V-0
	Receptacle			
Contact	Header	Copper alloy	Contacted part : gold plating Signal contact-mounting part : gold plating Power contact-mounting part : pure tin plating	—
	Receptacle			
Reinforcement metal fitting	Brass		Pure tin plated	—

❸Connector type	P S	: Header type : Receptacle type
❹Contact pitch		: 0.5mm
❺Product type	SV	: Vertical
❻Product height type	Mating height [mm] = Numerical value on the header side	

◆High-speed transmission property (FX23 : h=15mm, FX23L : h=12mm)

●Pin assignment

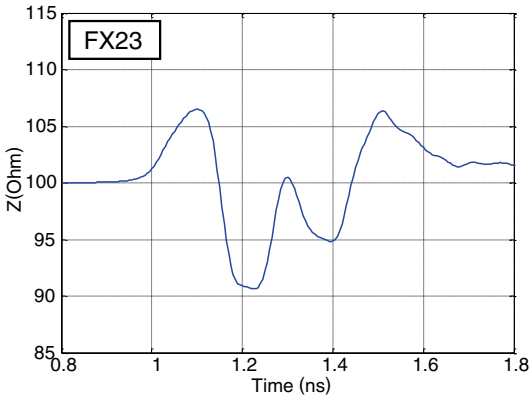

The following pin arrangement is recommended to match the 100Ω differential impedance and to contain cross-talk.

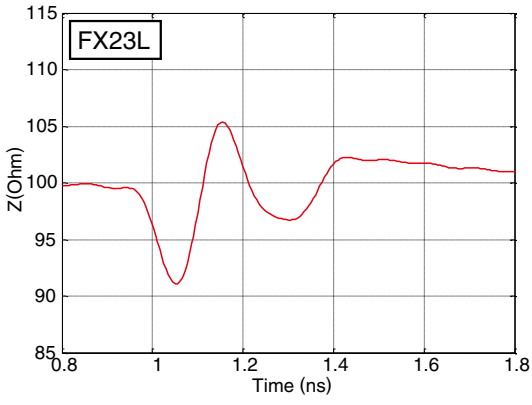

Signal pin
Diff pair
Ground pin

●Differential impedance 80ps rise time (20 to 80%)

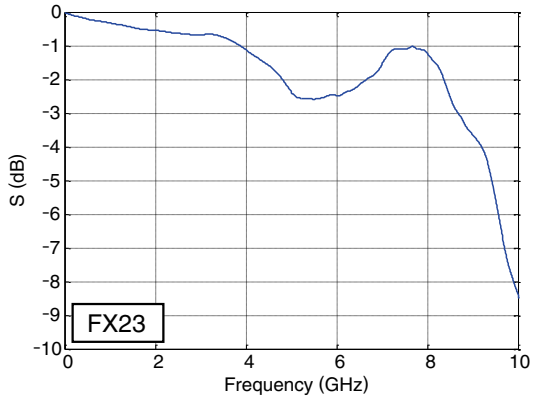

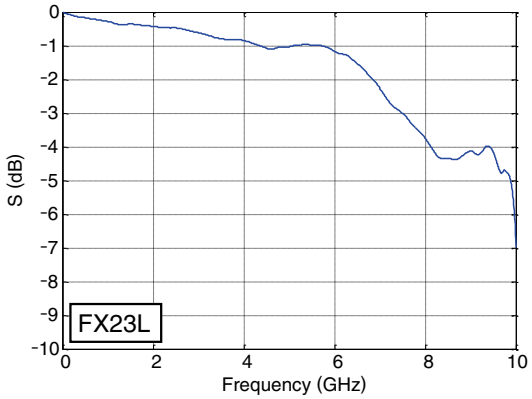

Meets the criterion of 100±10Ω at the rise time of 80ps (20 to 80%).

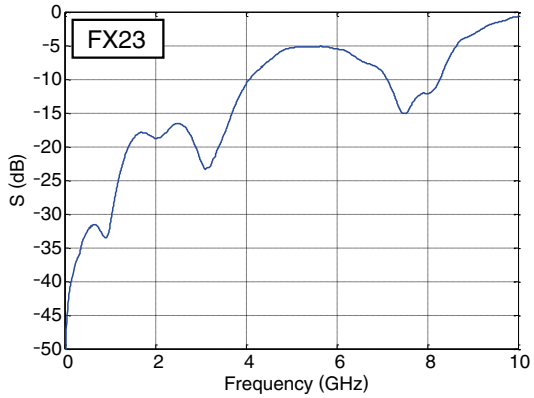

Sep.1.2021 Copyright 2021 HIROSE ELECTRIC CO., LTD. All Rights Reserved.

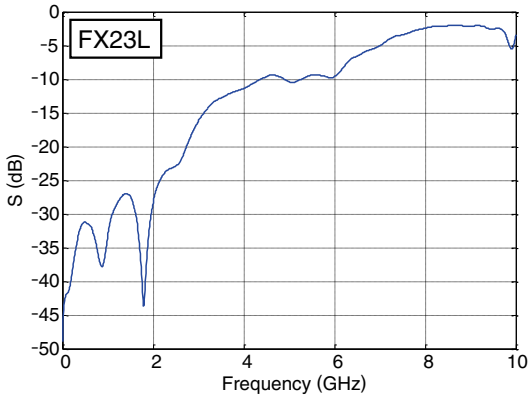

●Insertion loss

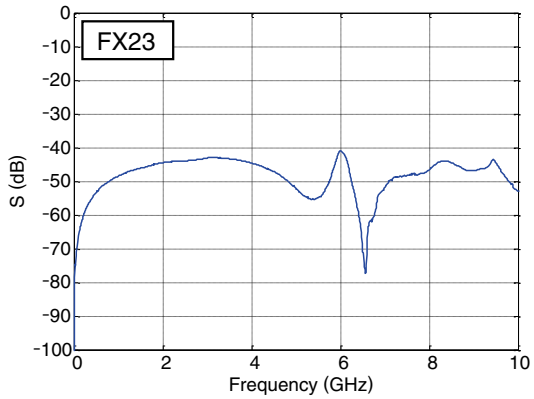

●Return loss

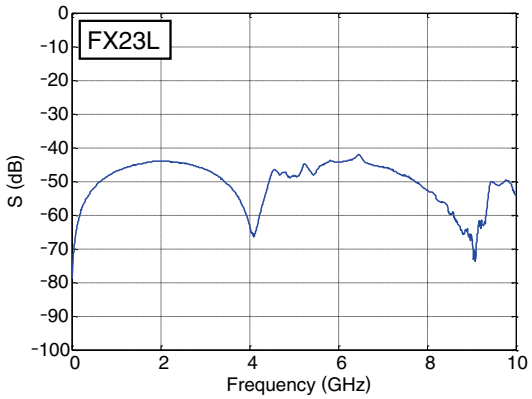

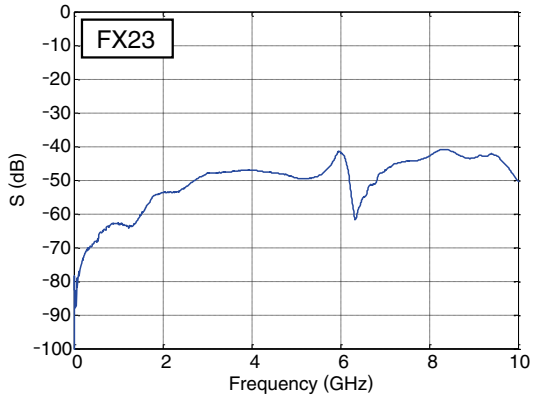

Passes insertion loss, return loss up to 5GHz.

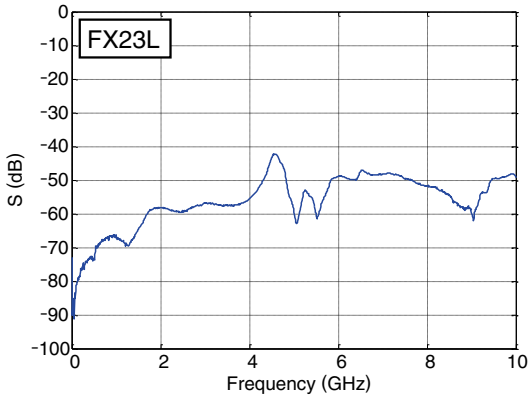

●Near end cross-talk (NEXT)

●Far end cross-talk (FEXT)

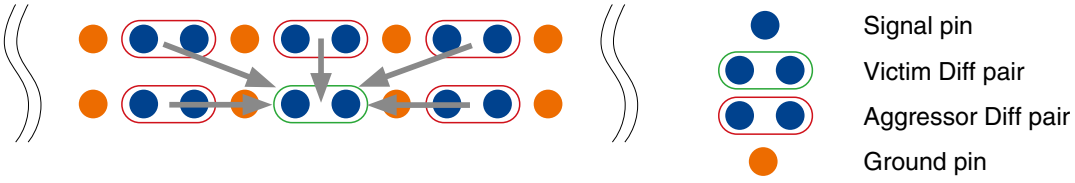

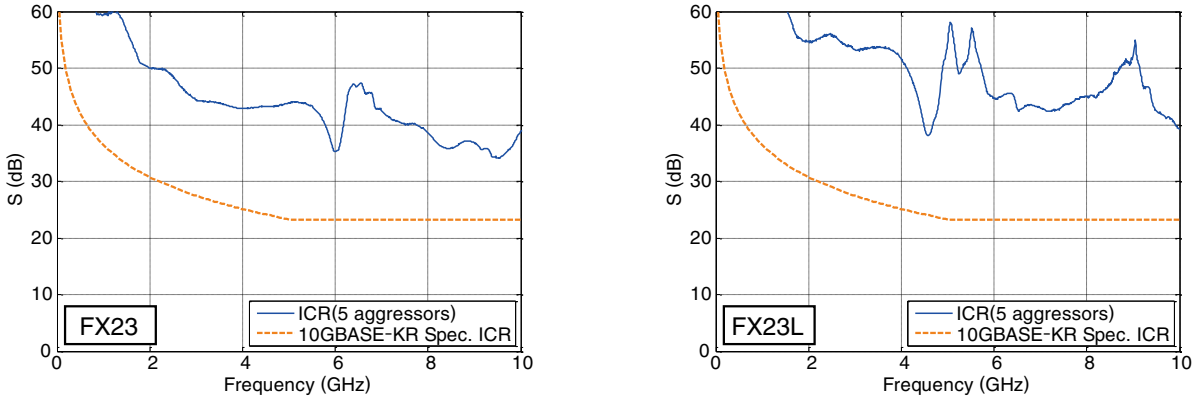

Low cross-talk up to 10GHz.

Sep.1.2021 Copyright 2021 HIROSE ELECTRIC CO., LTD. All Rights Reserved.

●Insertion loss/cross-talk ratio (ICR) for FEXT

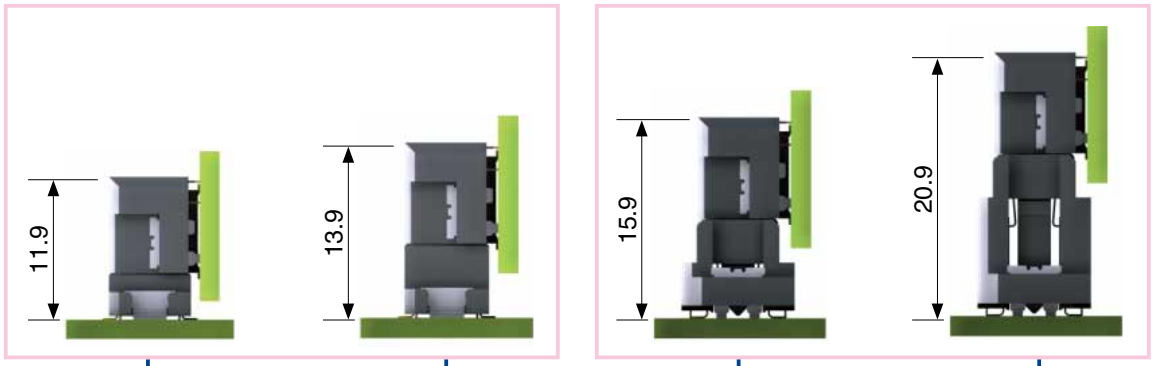

Insertion loss/cross-talk ratio (ICR) for FEXT using 5 sets of Aggressors has an adequate margin according to the specification of IEEE802.3ap.

In Regards to Storing FX23 Series

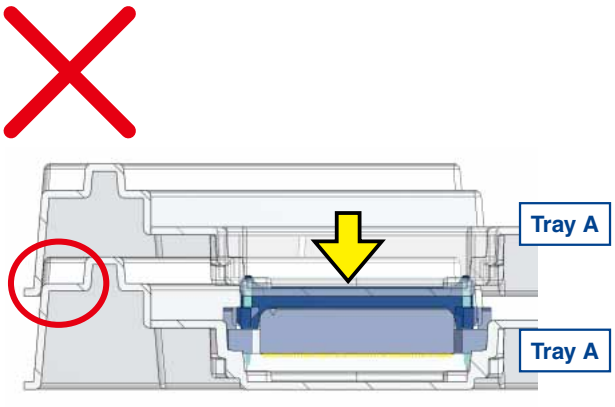

There are two types of tray (A and B) for the FX23 series.
These have been designed to stack in alternating order (A-B-A-B...) for shipping and storage.

If tray A is stacked on top of another tray A, or if tray B is stacked on top of another tray B, the trays will put a load on the connectors, potentially causing connector breakage or deformation.

When stacked correctly, the outer structure of the trays will prevent any load from being placed on the connectors below.

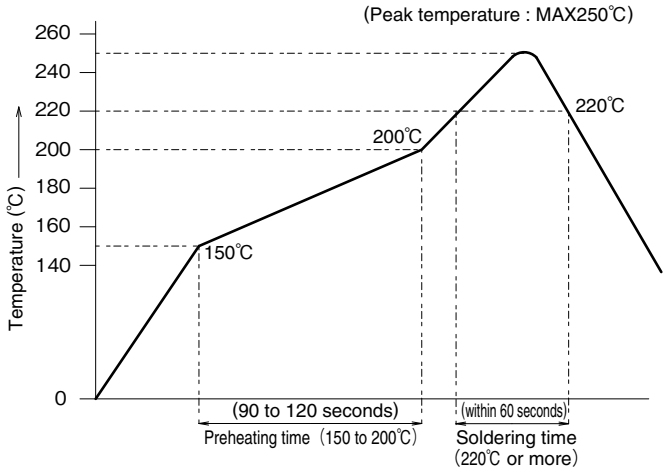

When stacked incorrectly, the outer structure of the trays will not function, resulting in adding load to the connector.

When storing the FX23 series, please ensure that the trays are stacked in alternating order. Thank you.

Recommended temperature profile

<Applicable conditions>

Test PCB	Dimension	: 110×60×1.6mm
	Material	: Glass epoxy
Solder composition		: Sn-3Ag-0.5Cu
Flux content		: 11wt%
Metal mask thickness		: 0.12mm, 0.15mm
Number of reflow times		: 2 times max.

∗The temperature profile is a reference under the condition of the above settings : Temperature profile may change depending on the conditions such as solder paste types, manufacturers, PCB size, and other soldering materials, please fully check the mounting conditions before use.

Cleaning conditions

●Cleaning with organic solvent

Solvent	Cleaning at normal temperature	Heating cleaning
IPA (Isopropyl alcohol)	○	○

●Cleaning with water

When water-type cleaning agents (terpene, alkaline saponification agents) are used, select cleaning agents based on the 'table of influence' on metals and resins issued by the cleaning agent manufacturer. Caution : Do not leave with any water content left.

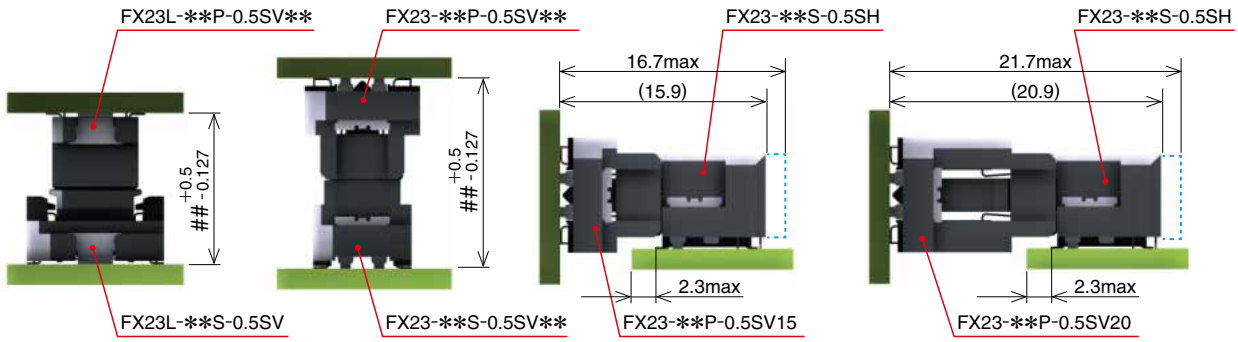

●Precautions in cleaning

When cleaning the parts with organic solvents and water-type agents, if flux or cleaning agents remain in the connector, it could cause the deterioration of electric performance. Please be sure to check if adequate cleaning has been carried out.

Precautions in use

●About the specified dimension between PCBs

The dimension between PCBs shall be within the following range :

: Stack height

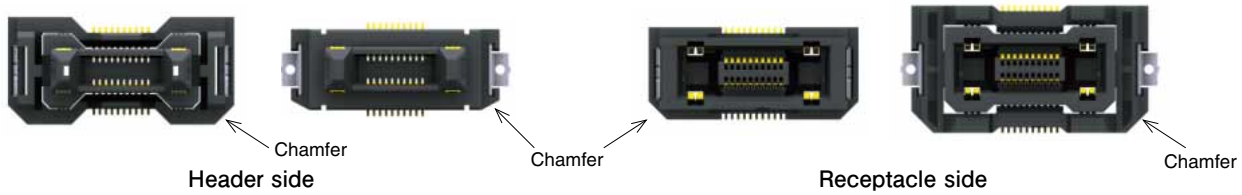

Sep.1.2021 Copyright 2021 HIROSE ELECTRIC CO., LTD. All Rights Reserved.

●Fixation among PCBs

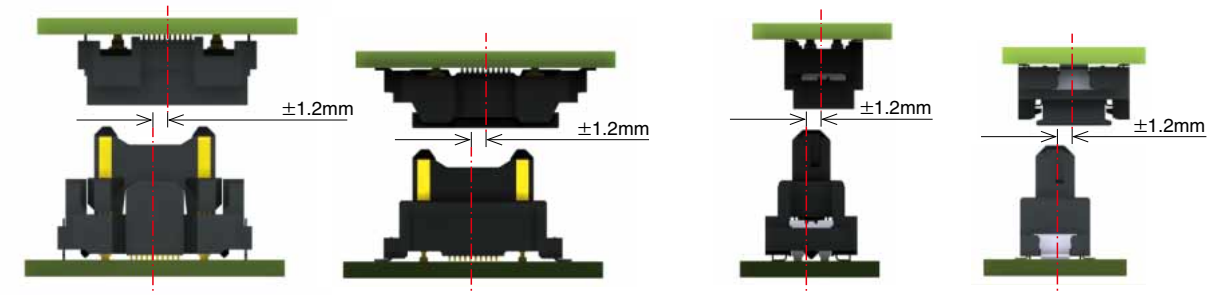

Please take measures to fix the PCB other than using connectors.

●Cautions in mating operations

・This connector is designed to prevent reverse insertion. The connector could be damaged if excessive force is exerted when mating. Avoid excessive force when mating. Mate only after confirming the following connector properties (chamfer of the external face) :

・The allowable misalignment is ±1.2mm in both the X and Y directions. After mating is started, proceed with the operation along a straight line without forcing the connector.

・When mating / un-mating, it is strongly recommended to insert or remove in a straight line. If not possible, the operation shall be carried out within the following angle.
Moreover, during the mating operation, be sure to proceed without forcibly applying a load to the connector. Allow the connector to be placed straight when the mating operation is completed.

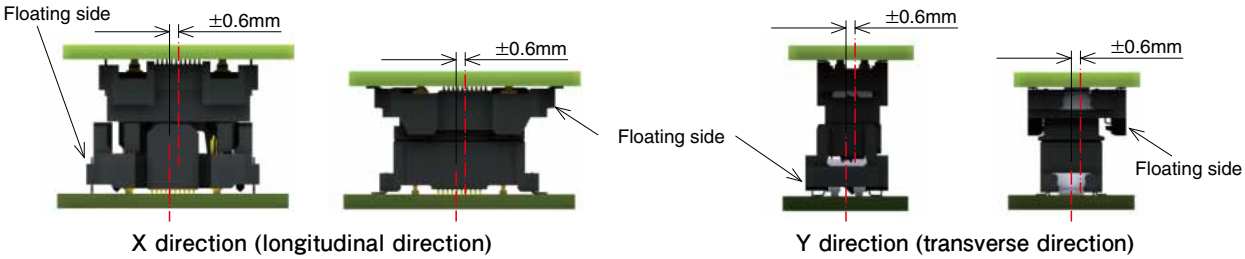

X direction (longitudinal direction) ⇒ for 20, 40, 60-pos. : within 2° ; for 80, 100, 120-pos. : within 10°
Y direction (transverse direction) ⇒ within 0.5°

(However, this is not a recommended operation. Damage to the connector could occur.)

●Permissible position deviation in the mated state (floating movable amount)

This connector is designed to float when mated, the permissible PCB position deviation in the mated state is ±0.6mm in both the X and Y directions.
However, it is not applicable to absorbing when the position deviation amount is continually changing due to vibration etc. Be sure to secure PCBs after mating. Additionally, the number of repetitive floating operations shall be according to the number of connector insertion/withdrawal cycles.
