

MPM-02V Series

Ultra Wide Input, 2W Miniature, Board Mount AC/DC Power Supplies

Key Features:

- 2W Output Power
- Universal 85-305 VAC Input
- EN 60950 Approved (UL)
- Meets IEC Safety Class II
- -25°C to +70°C Operation
- Single Regulated Output
- >300 kHour MTBF
- Ultra-Miniature DIP Case

Notes:

- Output voltage accuracy for 3.3V output models is $\pm 6\%$ Max.
- Load regulation is measured for an output change of 10% to 100% at nominal input line.
- The **MPM-02V** meets EN 55022 Class B without external components. For applications where noise sensitivity is critical, a recommended circuit is given below.
- It is recommended that a fuse be used on the input of a power supply for protection. For the **MPM-02V** series, a 0.5A/250VAC slow blow should be used.

Typical Connection

The diagram above illustrates a typical application connection of the **MPM-02V** series. Notes on this circuit (starting with the input circuit) are:

- To maintain clearance and creepage distances (for Class I & Class II devices) the board layout should guarantee the following spacing between the L and N inputs (before the fuse):

Clearance - 2 mm

Creepage - 2.5 mm

- The recommended fuse is a 0.5A/250V slow blow. Additionally, a thermistor (NTC) may be used on the input line. A 5D-9 is recommended.
- For EMI sensitive applications, the input filtering circuit (inside the dotted boxes) may be added. The filter consists of:

Cx: Capacitor C3 is 0.1 μ F/300V to 0.33 μ F/300V

Cv: Capacitors C1 and C2 are 2200 pF/400V

T1: Common mode choke. Inductance is about 10 mH to 30 mH.

- The MOV is required for surge protection. Recommended is a 561KD14.

- The output filtering capacitor (C5) is a high frequency, low resistance electrolytic capacitor. A ceramic capacitor (C4) is used to filter high frequency noise. Recommended values are given in the table at right.

- The TVS is recommended to protect application circuitry in the event of a fault. Recommended values are given in the table at right.

V _{OUT}	C4	C5	TVS
3.3	1 μ F/50V	220 μ F	SMBJ7.0A
5.0	1 μ F/50V	220 μ F	SMBJ7.0A
9.0	1 μ F/50V	120 μ F	SMBJ12A
12.0	1 μ F/50V	120 μ F	SMBJ20A
15.0	1 μ F/50V	120 μ F	SMBJ20A
24.0	1 μ F/50V	68 μ F	SMBJ30A
