

Multimedia Expansion Board II (MEB II) Information Sheet

Thank you for purchasing the Microchip Multimedia Expansion Board II (MEB II). This information sheet highlights some important details that will help you successfully use the board as quickly as possible.

Additional information can be accessed at: <http://www.microchip.com/meb2>.

Features

The MEB II is a compact, highly versatile development board that can be connected to a PIC32 starter kit for the purpose of developing multimedia applications. Refer to the MEB II web page listed above for the list of supported PIC32 starter kits. The MEB II supports detachable display boards allowing for a variety of resolutions. The MEB II kit includes a 4.3" WQVGA PCAP touch display daughter board.

Features of the MEB II include:

- Low-Cost Controllerless (LCC) graphics with PCAP touch solution (on the display daughter board)
- VGA camera sensor
- 24-bit audio codec
- Bluetooth® module
- Wi-Fi module
- Asynchronous SRAM (may not be populated on all boards)
- microSD slot
- Accelerometer
- Temperature sensor

Getting Started

To get started with the MEB II, follow these steps:

1. In a Web browser, visit <http://www.microchip.com/meb2>.
2. Select the demonstration of interest from the list provided on the initial page.
3. Download the selected demonstration and follow the instructions in the ReadMe file (provided in the demonstration project) to build and run the demonstration.

Refer to the "Multimedia Expansion Board II (MEB II) User's Guide", which is available from the MEB II web page for detailed information.
