

Oven Controlled Crystal Oscillator

NA-10 MHz-2400 series

2400 Series-square wave in 25.4x25.4mm DIP package

NA-10M-2400 series oscillators are designed for applications where space is at a premium and good frequency stability is required. The oscillators can be used in many communications applications. A choice of quartz resonators offers a variety of performance versus cost options to fit most applications.
