Description

The P582-006-V2 DisplayPort 1.2 to HDMI Adapter Cable connects a DisplayPort computer to the HDMI port on a monitor, projector or television. With a latching DisplayPort male connector on one end and an HDMI male connector on the other, this cable requires no separate adapter. It lets you use your existing HDMI display instead of buying a new DisplayPort monitor.

Ideal for displaying crystal-clear video on a large monitor or digital sign, this cable supports Ultra High Definition (UHD) video resolutions up to 3840 x 2160 (4K x 2K), as well as rich, full audio (if your DisplayPort card supports audio passthrough) and HDCP (High-Definition Content Protection). This in-line passive adapter is designed for use with Dual-Mode (DP++) DisplayPort graphics cards.

Gold-plated connectors and contacts ensure excellent conductivity. The Displayport plug latches to the port to provide a secure connection. Integral strain relief ensures the cable and molded connectors last a long time.
