PASTERNACK®
THE ENGINEER'S RF SOURCE

6 dB Fixed Attenuator, TNC Male to TNC Female Black Anodized Aluminum Heatsink Body Rated to 25 Watts Up to 18 GHz

RF Fixed Attenuators Technical Data Sheet PE7054-6

Features

- Bidirectional
- DC to 18 GHz Frequency Range
- Attenuation 6±0.8 dB
- Max Power 25 Watts (CW)
- VSWR < 1.4:1

Applications

- Instrumentation
- Precision measurements
- Prototyping and characterization
- Production systems

Description

Pasternack carries a wide range of fixed attenuators with a broad selection of attenuation levels, frequency ranges, and power dissipation ranges. RF microwave attenuators (also known as RF pads) lower the amplitude of a signal (attenuate) a known amount and can be used in a wide variety of applications. These attenuator pads are used when a signal needs to be reduced to protect measurement equipment or other circuitry, to extend the range of power meters and amplifiers, and to impedance match circuits by reducing the VSWR seen by adjacent components. RF attenuators can prevent signal overload in amplifiers, receivers and detectors, adjusting the signal level to a range that is optimal.

Few RF components are as commonly used as fixed coaxial attenuators, and Pasternack carries one of the largest in-stock varieties and ships them same day. The 6 dB Fixed Attenuator PE7054-6 is rated to 25 Watts and operates from DC to 18 GHz. The versatile coaxial package uses TNC male to TNC female connectors and is also REACH and RoHS compliant. The Black Anodized Aluminum Heatsink body allows for efficient heat dissipation under high power usage conditions.
