

PIC32 Ethernet Starter Kit II User's Guide

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights.

Trademarks

The Microchip name and logo, the Microchip logo, dsPIC, FlashFlex, flexPWR, JukeBlox, KEELOQ, KEELOQ logo, Kleeer, LANCheck, MediaLB, MOST, MOST logo, MPLAB, OptoLyzer, PIC, PICSTART, PIC³² logo, RightTouch, SpyNIC, SST, SST Logo, SuperFlash and UNI/O are registered trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

**QUALITY MANAGEMENT SYSTEM
CERTIFIED BY DNV
= ISO/TS 16949 =**

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

PIC32 Ethernet Starter Kit II User's Guide

NOTES:

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our web site (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXXXXXA”, where “XXXXXXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® X IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using the PIC32 Ethernet Starter Kit II. Items discussed in this chapter include:

- [Document Layout](#)
- [Conventions Used in this Guide](#)
- [Recommended Reading](#)
- [The Microchip Web Site](#)
- [Development Systems Customer Change Notification Service](#)
- [Customer Support](#)
- [Document Revision History](#)

DOCUMENT LAYOUT

This document describes how to use the PIC32 Ethernet Starter Kit II (all also referred to as “starter kit”) as a development tool to emulate and debug firmware on a target board. This user’s guide is composed of the following chapters:

- **Chapter 1. “Introduction”** provides a brief overview of the starter kit, highlighting its features and uses.
- **Chapter 2. “Hardware”** provides the hardware descriptions of the starter kit.
- **Appendix A. “Schematics”** provides a block diagram and detailed schematics of the starter kit.
- **Appendix B. “Bill of Materials (BOM)”** provides the bill of materials for the starter kit

PIC32 Ethernet Starter Kit II User's Guide

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Italic characters	Referenced books	<i>MPLAB IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u><i>File > Save</i></u>
Bold characters	A dialog button	Click OK
	A tab	Click the Power tab
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
<i>Italic Courier New</i>	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets []	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: { }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }
Notes	A Note presents information that we want to re-emphasize, either to help you avoid a common pitfall or to make you aware of operating differences between some device family members. A Note can be in a box, or when used in a table or figure, it is located at the bottom of the table or figure.	Note: This is a standard note box.
		CAUTION This is a caution note.
		Note 1: This is a note used in a table.

RECOMMENDED READING

This user's guide describes how to use the starter kit. The following Microchip documents are available and recommended as supplemental reference resources.

PIC32MX5XX/6XX/7XX Family Data Sheet (DS60001156)

Refer to this document for detailed information on PIC32 devices. Reference information found in this data sheet includes:

- Device memory maps
- Device pinout and packaging details
- Device electrical specifications
- List of peripherals included on the devices

MPLAB® X IDE User's Guide (DS50002027)

Refer to this document for more information pertaining to the installation and implementation of the MPLAB X IDE software, as well as the MPLAB SIM Simulator software that is included with it.

Universal Serial Bus Specification and Associated Documents

The Universal Serial Bus is defined by the USB 2.0 specification and its associated supplements and class-specific documents. These documents are available from the USB Implementers Forum. See their web site at: <http://www.usb.org>

THE MICROCHIP WEB SITE

Microchip provides online support via our web site at: <http://www.microchip.com>. This web site makes files and information easily available to customers. Accessible by most Internet browsers, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listings
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listings of seminars and events; and listings of Microchip sales offices, distributors and factory representatives

PIC32 Ethernet Starter Kit II User's Guide

DEVELOPMENT SYSTEMS CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at www.microchip.com, click on Customer Change Notification and follow the registration instructions.

The Development Systems product group categories are:

- **Compilers** – The latest information on Microchip C compilers and other language tools
- **Emulators** – The latest information on the Microchip in-circuit emulator, MPLAB REAL ICE™
- **In-Circuit Debuggers** – The latest information on the Microchip in-circuit debugger, MPLAB ICD 3
- **MPLAB X IDE** – The latest information on Microchip MPLAB X IDE, the Windows® Integrated Development Environment for development systems tools
- **Programmers** – The latest information on Microchip programmers including the PICkit™ 3 development programmer

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at: <http://support.microchip.com>

DOCUMENT REVISION HISTORY

Revision A (February 2014)

This is the initial release of this document.

Revision B (March 2015)

All references to the LAN8470 PHY Daughter Board have been updated to LAN8740A.

PIC32 Ethernet Starter Kit II User's Guide

NOTES:

Chapter 1. Introduction

Thank you for purchasing a Microchip Technology PIC32 Ethernet Starter Kit II. This board provides a low-cost, modular development system for Microchip's line of 32-bit microcontrollers.

The starter kit is preloaded with demonstration software for the user to explore the new features of the PIC32. It is also expandable through a modular expansion interface, which allows the user to extend its functionality. The starter kit also supplies on-board circuitry for full debug and programming capabilities.

This chapter covers the following topics:

- [Kit Contents](#)
- [PIC32 Ethernet Starter Kit II Functionality and Features](#)

The preprogrammed example code on the PIC32 MCU can be downloaded from the Microchip web site (www.microchip.com). All project files have been included so that the code may be used directly to restore the PIC32 MCU on the starter kit to its original state (i.e., if the sample device has been reprogrammed with another program) or so you can use the tutorial code as a platform for further experimentation.

1.1 KIT CONTENTS

The PIC32 Ethernet Starter Kit II contains the following items:

- PIC32 Ethernet Starter Kit II Development Board
- LAN8740A PHY Daughter Board
- USB mini-B to full-sized A cable – USB debug cable to debug and power the board
- USB micro-B to full-sized A cable – PIC32 USB cable to communicate with the PIC32 USB port
- RJ-45 CAT5 Ethernet patch cable – Ethernet CAT5 cable to communicate with the PIC32 Ethernet port

Note: If you are missing any part of a kit, contact a Microchip sales office for assistance. A list of Microchip offices for sales and service is provided on the back page of this document.

PIC32 Ethernet Starter Kit II User's Guide

1.2 PIC32 ETHERNET STARTER KIT II FUNCTIONALITY AND FEATURES

1.2.1 Development Board

Representations of the layout of the development board in the PIC32 Ethernet Starter Kit II are shown in [Figure 1-1](#) and [Figure 1-2](#).

The top assembly of the board includes these key features, as indicated in [Figure 1-1](#):

1. PIC32MX795F512L 32-bit microcontroller (U2).
2. Green power indicator LED (D4).
3. On-board crystal for precision microcontroller clocking (8 MHz) (Y1).
4. USB connectivity for on-board debugger communications (J7).
5. Debug indicator LED (D7).
6. Three push button switches for user-defined inputs (SW1, SW2, SW3).
7. Three user-defined indicator LEDs (D1, D2, D3).
8. USB Type A receptacle connectivity for PIC32 host-based applications (J4).
9. HOST mode power jumper (J5).
10. LAN8740A PHY Daughter Board headers (J2)
11. 50 MHz Ethernet PHY oscillator (Y3).
12. 32 kHz oscillator (optional) (Y2).
13. USB Host and OTG power supply for powering PIC32 USB applications (U4).

Note: When running self-powered USB device applications, open the jumper JP2 to prevent possibly back-feeding voltage onto the VBUS from one port on the host to another (or from one host to another).

For details on these features, refer to [Chapter 2. “Hardware”](#).

FIGURE 1-1: PIC32 ETHERNET STARTER KIT II LAYOUT (TOP VIEW)

The bottom assembly of the board includes these key features, as indicated in Figure 1-2:

1. Regulated +3.3V power supply for powering the starter kit through USB or expansion board (U8).
2. Connector for various expansion boards (J1).
3. USB Type micro-AB receptacle for OTG and USB device connectivity for PIC32 OTG/device-based applications (J3).
4. PIC24FJ256GB106 USB microcontroller for on-board debugging (U6).

FIGURE 1-2: PIC32 ETHERNET STARTER KIT II LAYOUT (BOTTOM VIEW)

PIC32 Ethernet Starter Kit II User's Guide

1.2.2 LAN8740A PHY Daughter Board

Representation of the layout of the daughter board in the PIC32 Ethernet Starter Kit II is shown in [Figure 1-3](#) and [Figure 1-4](#).

FIGURE 1-3: DAUGHTER BOARD LAYOUT (TOP VIEW)

FIGURE 1-4: DAUGHTER BOARD LAYOUT (BOTTOM VIEW)

Chapter 2. Hardware

This chapter describes the hardware features of the PIC32 Ethernet Starter Kit II.

2.1 HARDWARE FEATURES

The key features of the PIC32 Ethernet Starter Kit II are provided in the following sections. They are presented in the order given in [Section 1.2 “PIC32 Ethernet Starter Kit II Functionality and Features”](#). You can refer to [Figure 1-1](#) and [Figure 1-2](#) for their locations on the board.

2.1.1 Processor Support

The PIC32 Ethernet Starter Kit II is designed with a permanently mounted (i.e., soldered) PIC32MX795F512L processor.

2.1.2 Power Supply

There are two ways to supply power to the PIC32 Ethernet Starter Kit II:

- USB bus power connected to USB debug connector, J7.
- An external application board with a regulated DC power supply that provides +5V can be connected to the J1 application board connector that is provided on the bottom side of the board.

One green LED (D4) is provided to show that the PIC32 microcontroller is powered up.

2.1.3 Debug USB Connectivity

The PIC32 Ethernet Starter Kit II includes a PIC24FJ256GB106 USB microcontroller that provides debugger connectivity over USB. This device is hard-wired to the PIC32 device to provide protocol translation through the I/O pins of the PIC24FJ256GB106 to the ICSP™ pins of the PIC32 device.

2.1.4 PIC32 USB Connectivity

There are three possible ways to connect to the PIC32 USB microcontroller:

- HOST Mode – Connect the device to the Type A connector J4, located on the top side of the starter kit. If using the Debug USB port to power the Host port, install jumper J5 to short the back-power prevention diode. Note that a maximum of ~400 mA can be supplied from the Debug USB port to the Host port using this method.

If the full 500 mA supply is needed, an external supply must be connected to the application board and jumper J5 must be removed to prevent back-powering the Debug USB port.

PIC32 Ethernet Starter Kit II User's Guide

- **DEVICE Mode** – Connect the debug mini-B USB cable to port J7 and then connect the starter kit to the host using a cable with a Type-B micro-plug to the starter kit's micro-A/B port J3, located on the bottom side of the starter kit. The other end of the cable must have a Type-A plug. Connect it to a USB host. Jumper J5 should be removed.
- **OTG Mode** – Connect the starter kit to the OTG device using an OTG micro-A/B cable to the micro-A/B port J3, located on the bottom side of the starter kit. The starter kit provides an on-board power supply capable of providing 120 mA Max. This supply is controlled by the PIC32MX795F512L microcontroller. Jumper J5 should be removed.

2.1.5 Switches

The push button switches provide the following functionality:

- SW1: Active-low switch connected to RD6
- SW2: Active-low switch connected to RD7
- SW3: Active-low switch connected to RD13

The push button switches do not have any debounce circuitry and require internal pull-up resistors, which allows you to investigate software debounce techniques. When Idle, the switches are pulled high (+3.3V) and when pressed, switches are grounded.

2.1.6 LEDs

The RD0 through RD2 LEDs are connected to PORTD of the processor. The PORTD pins are set high to light the LEDs.

2.1.7 Oscillator Options

The installed microcontroller has an oscillator circuit connected to it. The main oscillator uses an 8 MHz crystal (Y1) and functions as the controller's primary oscillator. Use of an external crystal is required to develop USB applications. The USB specification dictates a frequency tolerance of $\pm 0.25\%$ for full speed. Non-USB applications can use the internal oscillators. The starter kit also has provisions for an external secondary 32 kHz oscillator (Y2); however, this component is not populated. A suitable oscillator, ECS-3X8, can be obtained from Digi-Key® (part number: X801-ND CMR200TB32.768KDZFTR).

2.1.8 120-Pin Modular Expansion Connector

The PIC32 Ethernet Starter Kit II is designed with a 120-pin modular expansion interface, which allows the board to provide a basic generic functionality and easy extendability to new technologies as they become available.

TABLE 2-1: STARTER KIT CONNECTOR PART NUMBERS

Connector	HIROSE Electric PN
Starter Kit Connector	FX10A-120P/12-SV1(71)
Application Board Connector	FX10A-120S/12-SV(71)

2.1.9 Ethernet PHY

The Microchip LAN8740A PHY Daughter Board is populated with a low-power, small-footprint, 10/100 Fast Ethernet LAN8740A PHY, which features Energy Efficient Ethernet (IEEE 802.3az) and Wake-on-LAN functionality. This daughter board is designed for easy development of RMII Ethernet control applications when it is connected into a compatible PIC32 starter kit.

U8	IC REG LDO 1.5A 3.3V 8DFN	Microchip Technology Inc.	MCP1727-3302E/MF
Y1	CRYSTAL 8.000 MHz, 18 pF, SMD	Abracon Corporation	ABM3B-8.000MHZ-B2-T
Y2	CRYSTAL 32.768 kHz 12.5 pF CYL	Abracon Corporation	AB26T-32.768KHZ
Y3	OSC MEMS 50.000 MHz 3.3V	Abracon Corporation	ASEMB-50.000MHZ-LC-T
Y4	CRYSTAL 12.000000 MHZ 8 pF SMD	NDK	NX3225SA-12.000000MHZ

Bill of Materials (BOM)

B.2 LAN8740A PHY DAUGHTER BOARD BILL OF MATERIALS

TABLE B-2: LAN8740A PHY DAUGHTER BOARD BOM

Reference	Description	Manufacturer	Part No.
C1, C3, C7, C8	Cap, Ceramic, 1 μ F, 16V X5R	TDK Corporation	C1608X5R1C105K
C2, C4, C5, C6	Cap, Ceramic, 0.1 μ F, 50V X7R	TDK Corporation	C1608X7R1H104M
C9	CAP 470 pF 50V CERAMIC X7R 0603	Yageo	CC0603KRX7R9BB471
C10, C11, C12, C13	CAP CER 12 pF 50V 5% NPO 0603	Yageo	CC0603JRNPO9BN120
C14	CAP CER 0.022 μ F 50V 20% X7R 0603	Murata Electronics North America	GRM188R71H223MA01D
FB1	FERRITE CHIP 600 OHM 500MA 0805	TDK Corporation	MMZ2012Y601B
J1	TWO CONN HEADER .050" 12 POS PCB GOLD	Sullins Connector Solutions	GRPB121VWVN-RC
@J1	TWO CONN HEADER .050" 3 POS PCB GOLD	Sullins Connector Solutions	GRPB031VWVN-RC
J2	CONN MAGJACK 1PORT 100 BASE-TX	Pulse Electronics Corporation	J3011G21DNL
R1, R2, R3, R4, R6, R8	RES 4.70K OHM 1/10W 1% 0603 SMD	Panasonic - ECG	ERJ-3EKF4701V
R5, R16	RES 10K OHM 1/10W 1% 0603 SMD	Stackpole Electronics Inc	RMCF0603FT10K0
R7	RES 1.50K OHM 1/10W 1% 0603 SMD	Vishay Dale	CRCW06031K50FKEA
R11, R12, R13, R14	RES 33 OHM 1/10W 1% 0603 SMD	Stackpole Electronics Inc	RMCF0603FT33R0
R15	RES 12.1K OHM 1/10W 1% 0603 SMD	Stackpole Electronics Inc	RMCF0603FT12K1
R17, R18, R19, R20	RES TF 1/10W 49.9 OHM 1% 0603	Stackpole Electronics Inc	RMCF0603FG49R9
R21, R22	RES TF 1/10W 249 OHM 1% 0603	Stackpole Electronics Inc	RMCF0603FG249R
R23	RES 0.0 OHM 1/4W 0805 SMD	Yageo	RC0805JR-070RL
U1	TX/RX Ethernet 32-pin QFN	Microchip Technology Inc.	LAN8740A
