

Raspberry Pi 3 B+ Baseplate

PRT-15008

This is a basic baseplate for the Raspberry Pi 3 B/B+. It is translucent in color and provides a simple mounting solution for wherever you want to put your Pi!

The baseplate is designed for the Raspberry Pi to securely remain on the acrylic by means of friction. The baseplate also aligns with the unit's forward mounting holes if you require additional security, but since screws are not required to form a firm connection, none are included.

INCLUDES

- 1 Raspberry Pi 3B+ Baseplate

FEATURES

- Secure mounting with no screws or fasteners required.
