2 Way-90° Power Splitter

QCH-392+

50Ω 600 to 3900 MHz

The Big Deal

- Wide bandwidth (over two octaves)
- High power handling up to 90W

CASE STYLE: PQ2098-1

Product Overview

Mini-Circuits new 2-way 90° power splitter, QCH-392+ capable of handling up to 90W with amplitude unbalance of 0.8 dB typ and phase unbalance of 5 deg. typ. Operating over a frequency range of 600 to 3900 MHz, the outstanding phase and amplitude unbalance make this component a versatile building block for use in a variety of systems and sub-system designs from balanced amplifiers and antenna feeds to military applications and more. The splitter is fabricated using laminated PCB process (1.0 x 0.5 x 0.2") and includes wrap-around terminations for good solderability and easy visual inspection.

Key Features

Feature	Advantages
Wide bandwidth	The QCH-392+ wide band width (600 - 3900 MHz) of a full decade makes it suitable for a wide range of applications.
High power handling, up to 90W	Usable in many systems with high-power requirements such as antenna feeds, power amplifiers, and others that require balanced high power outputs.
Low Phase and Amplitude Unbalance(at 600-3900 MHz): • 0.8 dB Amplitude Unbalance • 5° Phase Unbalance	QCH-392+ produces nearly equal signals with 90° phase shift - ideal for I/Q systems, balanced amplifiers, antenna feeds, phase shifters, and many more applications.
