

Quectel SC600T

Multi-mode Smart LTE Module with Wi-Fi & Bluetooth

SC600T is Quectel's new generation of multi-mode Smart LTE Cat 6 module with built-in Android 9.0 OS. Based on Qualcomm octa-core and 64-bit high-performance processors with built-in Adreno™ 506 GPU, SC600T is designed to support leading performance, various multimedia features and Quick Charge 3.0 technology. It is ideal for both industrial and consumer applications with high data-rate and multimedia functions. SC600T is available in four variants: SC600T-NA*, SC600T-EM*, SC600T-JP* and Wi-Fi & BT only version SC600T-WF*.

SC600T supports multiple-input multiple-output (MIMO) technology. The use of multiple antennas at the receiver end at the same time and on the same frequency band greatly minimizes errors and optimizes the data speed. This module also combines high-speed wireless connectivity with embedded multi-constellation and high-sensitivity GNSS (GPS, GLONASS and BeiDou) receiver for positioning.

A rich set of interfaces (such as LCM, Camera, Touch Panel, MIC, SPK, UART, USB, I2C, SPI) extend the applicability of the module to a wide range of M2M applications, including smart POS, smart cash registers, smart home gateways, smart robots, smart wearables, security surveillance, PDA & tablets, vending machines, delivery lockers, police and law enforcement equipment, in-car video streaming and entertainment systems, etc.
