HF RoHS Pb GREEN SP3002 Lead-Free/Green Series

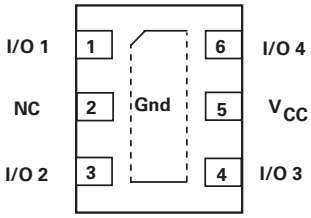

Description

The SP3002 has ultra low capacitance rail-to-rail diodes with an additional zener diode fabricated in a proprietary silicon avalanche technology to protect each I/O pin providing a high level of protection for electronic equipment that may experience destructive electrostatic discharges (ESD). These robust diodes can safely absorb repetitive ESD strikes at the maximum level (Level 4) specified in the IEC 61000-4-2 international standard without performance degradation. Their very low loading capacitance also makes them ideal for protecting high speed signal pins such as HDMI, DVI, USB2.0, and IEEE 1394.

Application Example

HDMI or DVI application example for the Littelfuse SP300x-04 protection devices. A single 4 channel SP300x-04 device can be used to protect four of the data lines in a HDMI/DVI interface. Two (2) SP300x-04 devices provide protection for the main data lines. Low voltage ASIC HDMI/DVI drivers can also be protected with the SP300x-04, the $+V_{CC}$ pins on the SP300x-04 can be substituted with a suitable bypass capacitor or in some backdrive applications the $+V_{CC}$ of the SP300x-04 can be floated or NC.
