

### 60 V, 3 A low drop Schottky rectifier

#### Features

- Negligible switching losses
- Low forward voltage drop
- Avalanche rated
- **ECOPACK2** component

#### Applications

- Switching diode
- SMPS
- DC/DC converter
- LED lighting

#### Description

Axial and surface mount power Schottky rectifier suited for switch mode power supplies and high frequency dc to dc converters.

Packaged in DO-201AD, DO-15, SMB, SMBflat and SMBflat Notch, this device is intended for use in low voltage, high frequency inverters and small battery chargers and for applications where there are space constraints, for example telecom battery charger.

| Product status  |        |
|-----------------|--------|
| STPS3L60        |        |
| Product summary |        |
| Symbol          | Value  |
| $I_{F(AV)}$     | 3 A    |
| $V_{RRM}$       | 60 V   |
| $T_{j(max.)}$   | 150 °C |
| $V_F(typ.)$     | 0.53 V |

# 1 Characteristics

**Table 1. Absolute ratings (limiting values at 25 °C, unless otherwise specified)**

| Symbol              | Parameter                                             |                          |                                                 | Value       | Unit |
|---------------------|-------------------------------------------------------|--------------------------|-------------------------------------------------|-------------|------|
| V <sub>RRM</sub>    | Repetitive peak reverse voltage                       |                          |                                                 | 60          | V    |
| I <sub>F(RMS)</sub> | Forward rms current                                   |                          |                                                 | 10          | A    |
| I <sub>F(AV)</sub>  | Average forward current, δ = 0.5, square wave         | SMB Flat Notch, SMB Flat | T <sub>L</sub> = 115 °C                         | 3           | A    |
|                     |                                                       | SMB, DO-201AD            | T <sub>L</sub> = 105 °C                         |             |      |
|                     |                                                       | DO-15                    | T <sub>L</sub> = 72 °C                          |             |      |

1. Pulse test:  $t_p = 380\text{ }\mu\text{s}$ ,  $\delta < 2\%$

To evaluate the conduction losses, use the following equation:

$$P = 0.44 \times I_{F(AV)} + 0.05 \times I_F^2_{(RMS)}$$

For more information, please refer to the following application notes related to the power losses :

- AN604: Calculation of conduction losses in a power rectifier
- AN4021: Calculation of reverse losses on a power diode

## 2 Package information

In order to meet environmental requirements, ST offers these devices in different grades of **ECOPACK** packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK is an ST trademark.

### 2.1 SMB Flat Notch package information

- Epoxy meets UL94, V0
- Lead-free package

**Figure 18. SMB Flat Notch package outline**
