ide for TWR-PROTO

TOWER SYSTEM

Prototyping Module
Quick Start Guide

freescale™
semiconductor

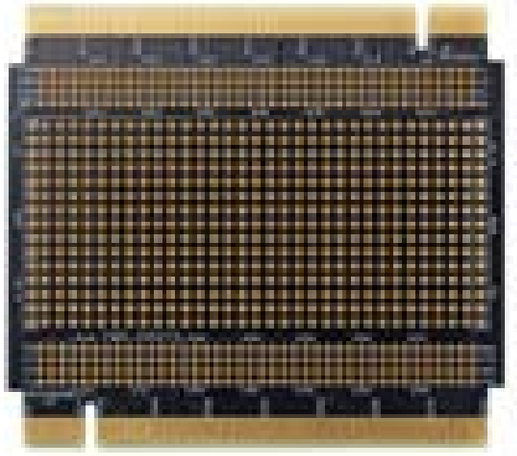

How to build your Tower

1. Press the card edge connector of each Tower module into a slot on the elevator—take care to match all the primary card edges and plug them into a functional elevator. A module may be placed into any slot on the elevator.
2. Press another **elevator** board onto the **secondary** card edges.

TWR-PROTO features

- Access to all signals on primary and secondary elevator connectors for prototyping and signal probing
- Prototyping area for adding custom circuitry to Tower System
- Multiple 5V, 3.3V and GND connections
