

FEATURES

- ◆RoHS compliant
- ◆Miniature SIP Package
- ◆Operating temperature: -40℃to+85℃
- ◆2:1 wide input voltage range
- ◆UL 94V-0 package material
- ◆No heatsink required
- ◆Industry standard pinout
- ◆1KVDC isolation
- ◆Continuous Short Circuit Protection
- ◆Internal SMD construction

APPLICATIONS

The WRD_YS-1W & WRD_YS-2W series are specially designed for applications where a wide range input voltage power supplies are isolated from the input power supply in a distributed power supply system on a circuit board. These products apply to:

1) Where the voltage of the input power supply is wide range (voltage range $\leq 2:1$);

2) Where isolation is necessary between input and output (Isolation Voltage $\leq 1000\text{VDC}$);

3) Where isolation is necessary between Vout1 and Vout2 (Isolation Voltage $\leq 1000\text{VDC}$);

4) Where the regulation of the output voltage and the output ripple noise are demanded.

APPLICATION NOTE

1) CS Pin

By connecting a low ESR capacitor between this terminal and the pin-7(Figure 1), the output ripple and noise may be further improved. Generally, the capacitance is no greater than 47uF.

2) Requirement on Output Load

To ensure this module can operate efficiently and reliably, During operation, the minimum output load is not less than 10% of the full load, If the actual load is less than the specified minimum load, the output ripple may increase sharply. If the actual output power is very small, please add an appropriate resistor as extra loading, or contact our company for other lower output power products.

3) Recommended Circuit

If you want to further decrease the input/output ripple, you can increase capacitance properly or choose capacitors with low ESR (Figure 1).

However, the capacitance of the output filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable

operation is ensured, the greatest capacitance of its filter capacitor sees (Table 1)

Cin: 5V & 12V 100uF
24V & 48V 10uF-47uF

Lin: 10uH-120uH

Cout: 100uF(TYP)

4) Input current

While using unstable power source, please ensure the output voltage and ripple voltage do not exceed indexes of the converter. The preceding power source must be able to provide for

converter sufficient starting current I_p (Figure 2). General: $I_p \leq 1.4 \cdot I_{in-max}$

5) No parallel connection or plug and play

When the environment temperature is higher than 71°C, the product output power should be less than 60% of the rated power.

No parallel connection or plug and play.

Note:

1. The load shouldn't be less than 10%, otherwise ripple will increase dramatically.
2. Operation under 10% load will not damage the converter; However, they may not meet all specification listed.
3. All specifications measured at Ta=25°C, humidity<75%, nominal input voltage and rated output load unless otherwise specified.
4. In this datasheet, all the test methods of indications are based on corporate standards.
5. Only typical models listed, other models may be different, please contact our technical person for more details.

RoHS COMPLIANT INFORMATION

This series is compatible with RoHS soldering systems with a peak wave solder temperature of 300° C for 10 seconds.
The pin termination finish on the SIP package type is Tin Plate, Hot Dipped over Matte Tin with Nickel Preplate. The DIP types are Matte Tin over Nickel Preplate. Both types in this series are backward compatible with Sn/Pb soldering systems.

REACH COMPLIANT INFORMATION

This series has proven that this product does not contain harmful chemicals, it also has harmful chemical substances through the registration, inspection and approval.
