ZHL-100W-251-S+

ZHL-100W-251XS+

Product Overview

The ZHL-100W-251+ is a Class A, high-power amplifier providing 100W saturated power over the 50 to 250 MHz band, ideal for a variety of high-power test setups as well as applications including communications, HAM bands and more. The ruggedly-designed amplifier provides unconditional stability and built-in self-protection against overheating. It is capable of withstanding short and open circuits at output while continuously delivering 100W of power. Housed in a rugged aluminum alloy case measuring 3.25 x 6.0 x 1.13", the unit features SMA connectors and an optional heat sink and fan attachment for cooling.

Key Features

Feature	Advantages
Wideband, usable from 20 to 450 MHz	Suitable for a broad range of high-power, wideband applications, including test setups, HAM communication and defense applications.
High gain, 46 dB	Enables signal amplification to 100W output without the need for multiple gain stages.
Good gain flatness, ± 0.7 dB	Provides consistent performance across frequency without the need for gain flattening using external components.
Built-in self-protection	In instances of potentially-damaging heat buildup within the housing, unshorting of DC supply, and short or open loads at the output, an automatic sensing feature signals the unit to power down.
Unconditional stability	Provides reliable performance independent of input and load conditions.

1. At constant open or short load 24V nominal supply voltage.

[▲] Heat sink and fan not included. Alternative heat sinking and heat removal must be provided by the user to limit maximum base-plate temperature to 85°C, in order to ensure proper performance. For reference, this requires thermal resistance of user's external heat sink to be 0.08°C/W max.
