### Description

**AI...GB** ferrules enable practical crimping of wires with increased insulation. Due to the increased diameter of the insulating collar this type of ferrule is ideal for use with AWG cables.

The metal insulating sleeve is made from a soft electrolytic copper with tin plating, which ensures optimum connection when crimped with the appropriate Phoenix Contact tools.

The insulating collar made from polypropylene, which is resistant to extreme heat, insulates and simplifies fitting onto the wire without having to splice the individual litz wires.
