The transistors BD 433, BD 435, BD 437, BD 439, and BD 441 are NPN silicon epibase power transistors in TO 126 plastic package (12 A 3 DIN 41 869, sheet 4). The collector is electrically connected to the metallic mounting area. The transistors are particularly suitable for use in push-pull output stages, driver stages as well as for general AF applications. Their complementary types are the PNP transistors BD 434, BD 436, BD 438, BD 440, and BD 442.

 Transistor fixing with M 3 screw. Starting torque < 0.8 Nm, washer or spring washer should be used.  
 1) If a 50 μ mica washer (ungreased) is used, the thermal resistance increases by 8 K/W and in case of a greased one by 4 K/W.
