# **ON Semiconductor**®

# To learn more about ON Semiconductor, please visit our website at <u>www.onsemi.com</u>

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at <a href="https://www.onsemi.com">www.onsemi.com</a>. Please email any questions regarding the system integration to <a href="https://www.onsemi.com">Fairchild\_questions@onsemi.com</a>.

Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized applications, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an equif prese

#### June 2016

# FSA2276 — DPDT (0.5 $\Omega$ ) HiFi Audio Switch w/ Negative Swing

#### **Features**

- V<sub>DD</sub> Operating Range: 1.65 to 5.5 V
- External Capacitor Connection for Pop and Click Noise Suppression
- Power-Off Protection on Common Ports
- R<sub>ON</sub> = 0.5 Ω (Typ.) at 1.8 V
- THD+N = -115 dB; 2 V<sub>RMS</sub>, 20 kΩ Load; f = 1 kHz
- X<sub>TALK</sub> = -122 dB at 1 V<sub>RMS</sub>, 50 Ω Load; f = 1 kHz
- Off Isolation = -115 dB at 1 V<sub>RMS</sub>, 50  $\Omega$  Load; f = 1 kHz
- 12-Lead UMLP 1.8 mm x 1.8 mm

#### **Applications**

- Mobile Phone, Tablet, Notebook PC, Media Player
- Docking Station, TV, Set-Top Box, LCD Monitor

#### Description

The FSA2276 is a high-performance, Double-Pole Double-Throw (DPDT) analog switch with negative swing audio capability. The FSA2276 features ultra-low audio R<sub>ON</sub> of 0.5  $\Omega$  (typical) at 1.8 V V<sub>DD</sub>. The FSA2276 operates over a V<sub>DD</sub> range of 1.65 V to 5.5 V, is fabricated with sub-micron CMOS technology to achieve fast switching speeds, and is designed for break-before-make operation. To minimize pop and click during operation, the turn on ramp time is selectable using an external capacitor (C\_EXT).

The FSA2276 features THD+N specifications that target a Hi-Fidelity audio quality into both 32  $\Omega$  headphones and line out type loads (>600  $\Omega$ ).

Name	Description	
VDD	Power Supply (1.65 to 5.5 V)	
C_EXT	Slow Turn On External Capacitor	
GND	Ground	
L <sub>SPKR</sub>	Audio L <sub>SPPKR</sub> Common I/O Port	
R <sub>SPKR</sub>	Audio R <sub>SPPKR</sub> Common I/O Port	
SEL	Select Pin	
MUTE	Mute Enable - Active High	
GND	Ground	
R2	Audio – Right Channel Source2 I/O Port	
R1	Audio – Right Channel Source1 I/O Port	
L2	Audio – Left Channel Source2 I/O Port	
L1	Audio – Left Channel Source1 I/O Port	
	VDD C_EXT GND L <sub>SPKR</sub> R <sub>SPKR</sub> SEL MUTE GND R2 R1 L2	

## **Truth Table**

Mute	SEL	Function	Resistor Terminations
0	0	$L1 = L_{SPKR}; R1 = R_{SPKR}$	R <sub>SHUNT(s)</sub> connect to L2/R2
0	1	$L2 = L_{SPKR}; R2 = R_{SPKR}$	R <sub>SHUNT(s)</sub> connect to L1/R1
1	0	L1 ≠ L <sub>SPKR</sub> ; L2 ≠ L <sub>SPKR</sub> ; R1 ≠ R <sub>SPKR</sub> ; R2 ≠ R <sub>SPKR</sub> (All Paths Hi-Z)	R <sub>SHUNT(s)</sub> OPEN
1	1	L1 ≠ L <sub>SPKR</sub> ; L2 ≠ L <sub>SPKR</sub> ; R1 ≠ R <sub>SPKR</sub> ; R2 ≠ R <sub>SPKR</sub> (All Paths Hi-Z)	R <sub>SHUNT(s)</sub> OPEN

## **Absolute Maximum Ratings**

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

Symbol	Paramete	Min.	Max.	Unit

### **Recommended Operating Conditions**

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

Notes:

1. Limits over the recommended temperature operating range ( $T_A = -40^{\circ}C$  to  $+85^{\circ}C$ ) are correlated by statistical quality.

2. Only valid for  $V_{SW} > 0 V$ .

3.  $V_{MUTE} \le V_{DD} + 0.3$  otherwise additional input leakage current may flow.
