Description and Applications

M/A-COM's MA4P290-1225T & MADP-007167-12250T RoHS equivalent product is a wideband, moderate insertion loss, high IP3, PIN Diode π Quad Attenuator in a low-cost, surface mount SOT-25 package. Four PIN Diodes in one package reduce circuit parasitics and improve circuit density.

These PIN Diode Attenuators perform well where Variable RF Amplitude Control is required in 50 and 75 Ω circuit applications.
