Connectorized Push-Pull **Wideband Amplifier**

50Ω 500 to 2000 MHz

The Big Deal

- Ultra-low second harmonic (high IP2)
- · Built-in reverse-bias protection
- Cost-effective design

ZX60-23LM+

Product Overview

This wideband amplifier is a very low-cost, high-performance 500MHz-2.0GHz device based upon a 50-ohm push-pull design. Built within Mini-Circuits's patented unibody construction, this amplifier features exceptionally low second-order harmonic distortion and is unconditionally stable. It is ideal for a wide range of wireless, small-signal, and lab and test equipment designs.

Kev Features

Feature	Advantages
Ultra-low distortion	This amplifier features excellent second harmonic performance and typical IP2 of 65dBm.
Wideband versatility	The 500MHz-2.0GHz bandwidth makes this amplifier ideal for a wide range of 50Ω applications, but also suitable as a low-noise amplifier (LNA) for GPS units, wireless cable (MMDS) and wireless LANs, for cellular applications, as well as for lab, instrumentation and test equipment.
Low cost/high value	The patented Mini-Circuits unibody construction design is unique among amplifiers of its class. In addition, it features 19.0dBm (max) output power in a push/pull configuration, extremely low second-order distortion, a wide bandwidth, and a rugged, connectorized case at a very competitive price point.

Connectorized Push-Pull Wideband Amplifier

50Ω 500 to 2000 MHz

Features

• Ultra low harmonic, -65 dBc typ.

- 11V-13V operation
- Good output IP3, 35 dBm typ.
- Unconditionally stable • Protected by US patent 6,790,049

Applications

- Cellular, CATV,
- LNA for GPS application
- General purpose small signal
- MMDS & Wireless LAN
- Lab
- Instrumentation
- Test Equipment
