

10 mm and 13 mm Slim Font Seven Segment Displays

Technical Data

HDSP-315x Series
HDSP-316x Series
HDSP-515x Series
HDSP-516x Series

Features

- **Excellent Appearance**
- **Slim Font Design**
- **Mitered Corners, Evenly Illuminated Segments**
- **Gray Face for Optimum On/Off Contrast**
- **Choice of Colors: DH AlGaAs Red, High Efficiency Red (HER), Yellow, and Green**
- **Low Current Available, AlGaAs Red and HER Choice of Character Size: 10 mm and 13 mm**
- **± 50° Viewing Angle**
- **Characterized for Luminous Intensity**

Description

The HDSP-31xx-51xx Series of displays incorporates a new slim font character design. This slim font features narrow width, specially mitered segments to give a fuller appearance to the illuminated character. Faces of these displays are painted a neutral gray for enhanced on/off contrast.

All devices are available in either common anode or common cathode configuration with right hand decimal point. Low current versions are available in either AlGaAs red or HER.

Notes:

1. For codes not listed in the figure above, please refer to the respective datasheet or contact your nearest Agilent representative for details.
2. Bin options refer to shippable bins for a part number. Color and Intensity Bins are typically restricted to 1 bin per tube (exceptions may apply). Please refer to respective datasheet for specific bin limit information.

Notes:

- Case temperature of device immediately prior to the intensity measurement is 25°C.
- The digits are categorized for luminous intensity. The intensity category is designated by a letter on the side of the package.
- The dominant wavelength, λ is derived from the CIE chromaticity diagram and is that single wavelength which defines the color of the device.
- Typical specification for reference only. Do not exceed absolute maximum ratings.

Electrical/Optical

For more information on electrical/optical characteristics, please see Application Note 1005.

Contrast Enhancement

For information on contrast enhancement, please see Application Note 1015.

Soldering/Cleaning

Cleaning agents from the ketone family (acetone, methyl ethyl ketone, etc.) and from the chlorinated hydrocarbon family (methylene chloride, trichloroethylene, carbon tetrachloride, etc.) are not recommended for cleaning LED parts. All of these

various solvents attack or dissolve the encapsulating epoxies used to form the package of plastic LED parts.

For further information on soldering LEDs, please refer to Application Note 1027.
