

Power supply, standard voltage

The BA3902, BA3904A, and BA3906 are power supplies used in car audio systems.

Dimensions (Units : mm)

BA2902, BA3904A, and BA3906 (SIP-M12)

Features

- available in an SIP-M12 package
- four power sources available from each IC
 - BA3902: 5.0 V, 8.5 V (×2), 9.0 V
 - BA3904A: 5.6 V, 8.55 V (×2), 9.0 V
 - BA3906: 5.6 V, 8.3 V (×3)
- incorporates a chip enable output and a mute output for the reference voltage output and accessory voltage detection
- all output circuits use a PNP transistor with a low saturation voltage
- AM and FM band selection switch included with a standby switch, which shuts down the IC when OFF
- internal output overload protection circuit prevents damage to the IC in the event the load is short circuited
- overvoltage protection circuit
- internal thermal overload also protects the IC

Applications

- car radio
