

4.00mm (.157") Pitch Micro-Max Power™ High-Current Header

75730 Board-to-Board

Left to right: 7, 10, and 15 circuit versions

Low-profile, high-current Micro-Max Power header provides versatile solutions in a compact design

Designed for high-current density applications, Molex's Micro-Max Power header is soldered directly to PCBs such as a Voltage Regulator Module (VRM) or a mother-board using a slotted via. With a current rating of 16.0A per blade at 30°C T-rise, Micro-Max Power may be used in any board-to-board application where power transfer is needed through a non-separable interface in a compact design.

Micro-Max Power headers are available in circuit sizes ranging from 4 to 24 blades in a single-row configuration. Optional voided circuits are available, to allow for use in high-voltage applications.

Features and Benefits

- 4.17mm (.164") connector height off the PCB, the low-profile design enhances system airflow
- Non-separable interface allows for higher current and greater density capability with lower resistance plane-to-plane compared to similar products with separable interfaces or standard stick headers
- Compact size improves airflow and saves PCB space
- Optional voided circuits with design flexibility for high-voltage applications
- Two blade lengths available to accommodate 1.57 to 2.36mm (.050 to .093") PCB thicknesses

SPECIFICATIONS

Reference Information

Packaging: Tray
UL File No.: E29179
Designed In: USA

Electrical

Voltage: 250V
Current: 16.0A at 30°C T-rise
Insulation Resistance: 5000 Megohms min.

Mechanical

Terminal Retention: 7.78 N (1.75 lbs) min.

Physical

Housing: LCP
Contact: Copper (Cu) Alloy
Plating:
Solder Tail Area – 100µ" Tin (Sn)
Underplating – 50µ" Nickel (Ni) overall
PCB Thickness:
Mother board – 1.57 to 3.18mm (.062 to .125")
Daughter Card – 1.27 to 2.36mm (.050 to .093")
Operating Temperature: -40 to +105°C

APPLICATIONS

4.00mm (.157") Pitch Micro-Max Power™ High-Current Header

75730 Board-to-Board

- VRM modules or any application for point-of-load power transfer
- Small Form Factor (SFF) PCs, workstations, servers, routers, switches, etc.
