G2LMMRCA006

6ft 3.5mm to RCA Audio Cable

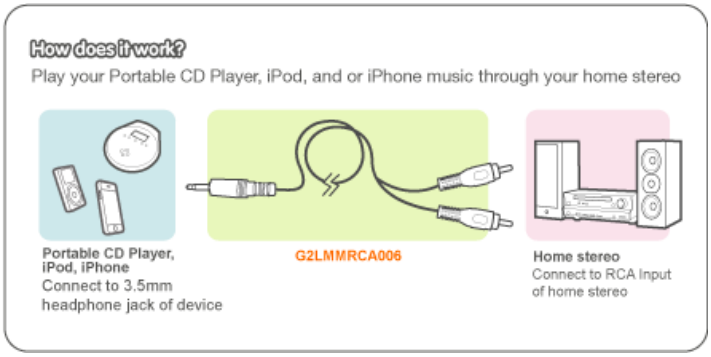

IOGEAR's 6ft 3.5mm (1/8" jack) to RCA audio cable allows you to connect your cassette deck, turn table, portable CD or Mini Disk players, MP3 Players, iPod and or iPhone to your home stereo receiver or stereo boom box. Thus, allowing you to amplify and share your favorite music, audio books, and audio tapes.

Plug the 3.5mm (1/8") end into your headphone jack of your audio device and then connect the RCA connectors into your home stereo or boom box to amplify and share your audio with everyone!

The six foot long cable accommodates most applications and is color coded with red and white RCA connectors for a convenient connection set up.

- Connect a 3.5mm mini stereo (1/8" jack) audio device to an RCA audio input device
- Connect your analog devices to your digital home stereo system
- Great for connecting the following to your home stereo system - Cassette deck, turn table, portable CD or Mini Disk players, MP3 Players, iPod and or iPhone
- Red and white color coded RCA connectors for a convenient connection set up
