

## Shielded Low Profile Surface Mount Inductors

- Operating Temperature Range -40°C to +155°C
- Ambient Temperature, Maximum 80°C
- Temperature Rise, Maximum 50°C

### Specifications @ 25 °C

- Notes:
- (1) The rated current is the approximate current at which inductance will be decreased by 20% from its initial (zero DC) value.
  - (2) The Heating Current is the DC current which causes the component temperature to increase by approximately 50°C. This current is determined by soldering the component on a typical application PCB, and then apply the current to the component for 30 minutes.
  - (3) Isat is the saturation current at which inductance rolls off approximately 30% from its initial unbiased inductance value.
  - (4) PC Board layout, proximity of other components, trace size and airflow will affect temperature rise and must be considered when selecting an inductor.

### Packaging

#### Standard: Embossed Tape & Reel

- (1) Case size 10, 10L & 12  
 Reel: Diameter: 7" (177.8mm) 13" (330.2mm)  
 Capacity: = 250 Units 1000 Units
- (2) Other case sizes  
 Reel: Diameter: Case size 15, 20, 30, 31, 40, 50 = 13" (330.2mm)  
 Capacity: Case size 20, 30, 31, 40 = 400 Units  
 Case size 15 = 500 Units  
 Case size 50 = 250 Units
