Coil data

Available for nominal voltages	12 V
Nominal power consumption of the unsuppressed coil at nominal voltage	1.1 W
Test voltage winding/contact	500 VAC _{rms}
Maximum ambient temperature range ¹⁾	- 40 to + 85 °C
Max. switching rate without contact loading	20 Hz
Operate time ²⁾	Typ. 3 ms
Release time ²⁾	Typ. 1.5 ms

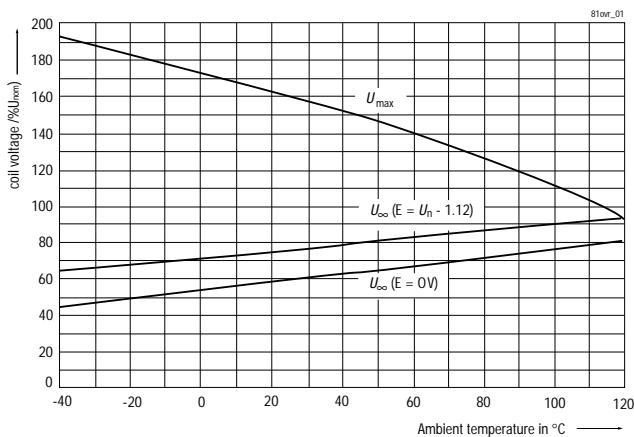

¹⁾ See also operating voltage range diagram

²⁾ Measured at nominal voltage without coil suppression

N.B.

A low resistive suppression device in parallel to the relay coil increases the release time and reduces the lifetime caused by increased erosion and/or higher risk of contact tack welding

Operating voltage range

Does not take into account the temperature rise due to the contact current
E = pre-energization
