GENERAL DESCRIPTION

Aeroflex's MUX8530 is a radiation tolerant, 16 channel multiplexer MCM (Multi Chip Module) with electrostatic discharge (ESD) protection on all channel inputs.

The MUX8530 has been specifically designed to meet exposure to radiation environments. It is available in a 56 lead High Temperature Co-Fired Ceramic (HTCC) Quad Flatpack (CQFP). It is guaranteed operational from -55°C to +125°C. Available screened in accordance with MIL-PRF-38534, the MUX8530 is ideal for demanding military and space applications.

ORGANIZATION AND APPLICATION

The MUX8530 consists of one 16 channel multiplexer arranged as shown in the block diagram, addressable by bus A_0~A_3 including enable which connects the addressed channel to a single output.
