Description

This optical receiver is a 3.3V device which contains an InGaAs PIN photodiode and a transimpedance amplifier with Automatic Gain Control and DC restore circuit assembled in a TO-46 package. It is designed for ATM and SDH/Sonet 622Mbps. Its double-lens optical system is designed for single mode fiber as well as for multimode fiber with a core diameter up to 62.5μm. Reliability Assurance based on Telcordia GR-468-CORE.

Application Guidelines

ESD handling

The receiver is sensitive to electrostatic discharges. When handling the device, precautions for ESD sensitive devices should be taken. These precautions include use of ESD protected work area with wrist straps, controlled work benches, floors etc.

Power Supply Filter

Power Supply decoupling capacitors are recommended for optimal performance of the receiver. A filter is recommended to minimize power supply noise. See Figure 7.

Figure 7 - Recommended Power Supply Filter

Data Outputs

The outputs Data and $\overline{\text{Data}}$ signals, are designed to drive a high load $>500'\Omega$. It is recommended to use Mindspeed MC2044C postamplifier ($R_{in} \sim 4.5'\Omega$) together with ZL60007.
