Note:

1. When input 85-100VAC/100-120VDC, it need to be voltage derated on basis of temperature derating;
2. Altitude should be derated based on temperature derating when it is 3000 - 5000m;
3. This product is suitable for use in natural air cooling environments, if in a closed environment, please contact our company's FAE.

Output filtering capacitors C2 is electrolytic capacitor, it is recommended to use high frequency and low impedance electrolytic capacitor. For capacitance and current of capacitor please refer to manufacture's datasheet. Capacitor voltage reduced to at least 80%. C1 is ceramic capacitor, which is used to filter high-frequency noise, advice use 1μF. TVS is a recommended component to protect post-circuits if converter fails. External input FUSE model is recommended to use 2A/250V slow fusing.
