1.5 Amp Low Dropout Positive Voltage Regulators

The PJ1086 seriesof high performance positive voltage regulators designed for use in applications requiring low dropout performance at full rated current, Additionally, the PJ1086 Series provides excellent regulation over variations due to changes in line, load and temperature. Outstanding features include low dropout performance at rated current, fast transient response, internal current limiting and thermal shutdown protection of the output device. The PJ1086 Series are three
terminal regulators with fixed and adjustable voltage options available in popular packages.

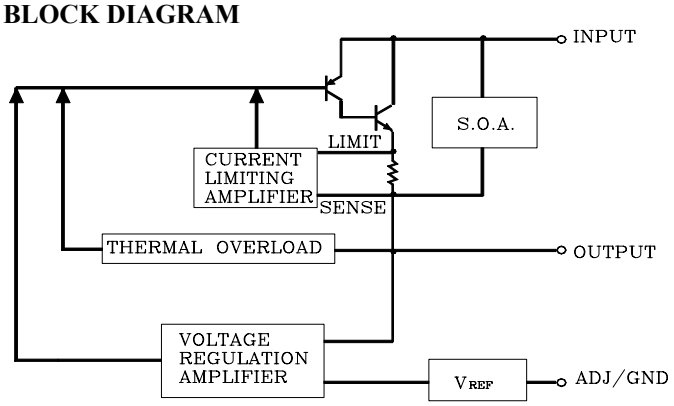

Pin:1.Adj(com)

3.In.

NOTE: Contact factory for additional voltage option.

FEATURES

- Low dropout voltage 1.3V max.
- Full current rating over line and temperature
- Fast transient response
- ±2%Total output regulation over line, load and temperature
- Adjust pin current max 120 μ A over temperature
- Line regulation typical 0.015%.
- Load regulation typical 0.05%.
- Fixed/adjustable output voltage
- TO-220 & TO-263 ,TO-252 package
