

HIGH POWER INDUCTOR

P7612 Family

Features

- * Lead-free (Pb-free)
- * RoHS compliant
- * High Current (to 55A Saturation)
- * Low DCR (to 0.5mΩ)
- * Low inductance values 0.1–0.44μH
- * Wide temperature range -55°C to +125°C
- * Closed magnetic circuit
- * Surface mount
- * Flat top for pick and place
- *

Applications

- * DC-DC Converters
- * Voltage Regulator Modules
- * Distributed Power
- * MPU power supplies
- * PDA/Notebook/Desktop/Server
- * Telecom equipment

DESCRIPTION

The P7612 family comprises high-energy-density surface mount inductors for high current power converters operating at up to 1MHz. The family handles large transient current spikes without saturation. Inductance values are available as low as 0.1μH.

Components are available in three mechanical sizes and offer compact solutions for applications requiring high energy storage.

The ferrite is moulded over the winding and provides a robust, self shielded structure that operates over a wide temperature range.

The P7612 family of components is compliant with RoHS Directive 2002/95/EC, and is suitable for Pb-free and conventional placement and reflow.

Notes

1. Inductance measured at 1MHz, 250mV (P7612-1208 500kHz, 100mV).
2. I_{RMS} is the current at which the temperature rise is 40°C typical, neglecting core losses.
3. I_{sat} is the DC current at which the zero-current inductance drops by 30% (P7612-1208 20%).
4. Operating temperature (part, i.e. ambient + temp rise) -55°C to +125°C.
5. For non-standard inductance values, please contact Profec.
