DESCRIPTION

The P7610 family comprises ultra low profile inductors for height constrained applications. The seated height is a maximum 1.0mm, and the parts employ a ceramic base for optimum heat transfer and mechanical robustness.

The family covers inductance over a range from 1.2 μ H to 330 μ H.

The P7610 family is compliant with RoHS Directive 2002/95/EC and is suitable for Pb-free and conventional placement and reflow.

Notes

1. Inductance measured at 100kHz, 100mV.
2. Rated Current, I_{RMS} , is the current at which the temperature rise is 40°C max.
3. Saturation Current, I_{sat} , is the DC current at which the zero-current inductance drops by 10% max.
4. Operating temperature -25°C to +85°C.
5. For non-standard inductance values, please contact Profec.
