**General Notes:**

1. The QHF-3 series covers 30 MHz to 1 GHz using a multi-section stripline design to produce wide operating bandwidths. Designs for many other frequency ranges are available to custom order.
2. High performance is achieved in the QHF-3 series using the Filmbrid™ Sandwich Package that's designed to work with both microstrip and balanced stripline.

**GENERAL SPECIFICATIONS**

- Coupling: - 3 dB nom.
- Impedance: 50 Ω nom.
- Phase Tolerance: 90° ±2° max.
- CW Input: 200 Watts  
(CW power input with 1.2:1 VSWR<sub>out</sub>)
- Peak Power: 1 kW max.
- Connector Type: 4 Solder Tabs
- Operating Temperature: - 55° to +85°C
