

Surface Mount Inductors

Toroid Mount meets UL94VO

Designed for IR & Vapor Phase Reflow Processes

Custom Designs Available

For use as a dual inductor, single inductor, or transformer. Connect in series for high inductance values or wired in parallel for less inductance, but twice the current capacity. As a 1:1 transformer, they can provide a minimum of 500 volts isolation with good frequency response.

These parts are manufactured using Sendust material. Lower cost versions of these products are available using powdered iron, however, there is an increase in core loss.

Series Operation:
Connect 2 & 4

Parallel Operation:
Connect 1 & 4, 2 & 3

Electrical Specifications at 25° C
