"HOCKEY PUCK"
SOLID STATE RELAY
40 THRU 80 AMPS
48 TO 530 VRMS

## FEATURES

- Photo isolation
- Up to 1200 V blocking voltage

- Both zero cross or random turn-on
- High surge capability
- Built-in snubber
- UL, CUR file E43203
- SCR Output Circuitry

INPUT

| Type | DC Input | AC Input |
| :--- | :---: | :---: |
| Control Voltage Range | 3 to 32 VDC | 90 to 280 VAC |
| Turn On Voltage | 3 VDC max. | 90 VAC max. |
| Turn Off Voltage | 1 VDC min. | 10 VAC min. |
| Max. Input Current | 25 mA at 32 VDC | - |
| Max. Reverse Voltage | -32 VDC | - |

OUTPUT

| Type | 240 | 380 | 480 |
| :--- | :---: | :---: | :---: |
| Output Voltage Range | 48 to 280 VAC | 48 to 400 VAC | 48 to 530 VAC |
| Blocking Voltage | 600 Vpk | 800 Vpk | 1200 Vpk |
| Max. Leakage Current (off) | 5 mA | 5 mA | 5 mA |
| Max. Voltage Drop (at rated current) | 1.7 VRMS |  |  |
| Max. Turn-On Time | Random Turn On (DC input): 1 ms <br> Zero Cross Turn On (DC input): $1 / 2$ cycles +1 ms <br> AC Input: 20 ms |  |  |
| Max. Turn-Off Time | DC Input: $1 / 2$ cycle +1 ms <br> AC Input: 40 ms |  |  |
| Min. Off-State (dv/dt) | $500 \mathrm{~V} / \mathrm{us}$ |  |  |

## GENERAL

| Dielectric Strength | $4000 \mathrm{Vrms} \mathrm{min}. \mathrm{(at} 50 / 60 \mathrm{~Hz}, 1 \mathrm{~min})$. |
| :--- | :---: |
| Insulation Resistance | $1000 \mathrm{Min} .($ at 500 VDC$)$ |
| Max. Capacitance (in/out) | 8 pf |
| Ambient Temperature | Operating: $-30^{\circ} \mathrm{C}\left(-22^{\circ} \mathrm{F}\right)$ to $80^{\circ} \mathrm{C}\left(176^{\circ} \mathrm{F}\right)$ |
|  | Storage: $-30^{\circ} \mathrm{C}\left(122^{\circ} \mathrm{F}\right)$ to $100^{\circ} \mathrm{C}\left(212^{\circ} \mathrm{F}\right)$ |
|  | Panel Mount |
| Termination | Screw |
| Weight | 88 g |

## RELAY ORDERING DATA

MECHANICAL DATA

Dimensions in inches with metric equivalents in parentheses. Tolerance: $\pm .010^{\prime \prime}$

## INSTALLATION

1. When mounting the relays side by side, provide a space equivalent to the width of a single SSR between two adjacent SSRs. Otherwise, reduce the load current flow to $1 / 2$ to $1 / 3$ of the rated current.
2. When mounting relays on heat sink surface, first apply a heat conductive grease to the metal back surface of the SSR. Press the SSR firmly onto the heat sink to ensure a good seal. Screw the SSR down to the heat sink.
3. Next, wire the screw terminals and securely tighten the screws.

## PRECAUTIONS

1. Before connecting a load that generates a high surge current, such as a lamp load to the SSR, make sure that the SSR can withstand the surge current of the load.
2. The product data sheet shows the non-repetitive peak value of the surge current that flows through the SSR. Normally, use $1 / 2$ of the non-repetitive peak surge current as the standard value. If a surge current exceeding that value is expected, connect a quick-blowing fuse to protect the SSR.
