

CDC304 OCTAL DIVIDE-BY-2 CIRCUIT/CLOCK DRIVER

SCAS325A – JULY 1990 – REVISED NOVEMBER 1995

- Replaces SN74AS304
- Maximum Output Skew of 1 ns
- Maximum Pulse Skew of 1.5 ns
- TTL-Compatible Inputs and Outputs
- Center-Pin V_{CC} and GND Configurations Minimize High-Speed Switching Noise
- Package Options Include Plastic Small-Outline (D) Package and Standard Plastic (N) 300-mil DIPs

D OR N PACKAGE
(TOP VIEW)

description

The CDC304 contains eight flip-flops designed to have low skew between outputs. The eight outputs (in-phase with CLK) toggle on successive CLK pulses. Preset ($\overline{PRE}$) and clear ($\overline{CLR}$) inputs are provided to set the Q outputs high or low independent of the clock (CLK) input.

The CDC304 has output and pulse-skew parameters $t_{sk(o)}$ and $t_{sk(p)}$ to ensure performance as a clock driver when a divide-by-two function is required.

The CDC304 is characterized for operation from 0°C to 70°C.

FUNCTION TABLE

INPUTS			OUTPUTS
$\overline{CLR}$	$\overline{PRE}$	CLK	Q1–Q8
L	H	X	L
H	L	X	H
L	L	X	$L^\dagger$
H	H	$\uparrow$	$\overline{Q_0}$
H	H	L	Q_0

[†] This configuration does not persist when PRE or CLR returns to its inactive (high) level.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

logic diagram (positive logic)

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)[†]

Supply voltage, V_{CC}	7 V
Input voltage, V_I	7 V
Maximum power dissipation at $T_A = 55^{\circ}\text{C}$ (in still air) (see Note 1): D package	0.77 W
N package	1.2 W
Storage temperature range, T_{stg}	-65°C to 150°C

[†] Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: The maximum package power dissipation is calculated using a junction temperature of 150°C and a board trace length of 300 mils, except for the N package, which has a trace length of zero. For more information, refer to the *Package Thermal Considerations* application note in the 1994 *ABT Advanced BiCMOS Technology Data Book*, literature number SCBD002B.

I_{IH}	$V_{CC} = 5.5\text{ V}$, $V_I = 2.7\text{ V}$		20		μA
I_{IL}	$V_{CC} = 5.5\text{ V}$, $V_I = 0.4\text{ V}$		-0.5		mA
$I_O^{\ddagger}$	$V_{CC} = 5.5\text{ V}$, $V_O = 2.25\text{ V}$	-50		-150	mA
I_{CC}	$V_{CC} = 5.5\text{ V}$, See Note 2		45	75	mA

[†] All typical values are at $V_{CC} = 5\text{ V}$, $T_A = 25^\circ\text{C}$.

[‡] The output conditions have been chosen to produce a current that closely approximates one half of the true short-circuit output current, I_{OS} .

NOTE 2: I_{CC} is measured with CLK and PRE grounded, then with CLK and CLR grounded.

PARAMETER MEASUREMENT INFORMATION

- NOTES: A. C_L includes probe and jig capacitance.
B. Input pulses are supplied by generators having the following characteristics: PRR $\leq$ 10 MHz, $t_r = 2.5$ ns, $t_f = 2.5$ ns.

PARAMETER MEASUREMENT INFORMATION

- NOTES: A. $t_{\text{sk(o)}}$, CLK to Q, is calculated as the greater of the following:
- The difference between the fastest and slowest of t_{PLHn} ($n = 1, 2, 3, \dots, 8$)
 - The difference between the fastest and slowest of t_{PHLn} ($n = 1, 2, 3, \dots, 8$)
- B. $t_{\text{sk(p)}}$ is defined as the greater of $|t_{\text{PLHn}} - t_{\text{PHLn}}|$ ($n = 1, 2, 3, \dots, 8$).

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
