SPECIFICATION

Part No.	:	**TG.10R.A.0113**
Product Name	:	Triton 4G/3G/2G Terminal Antenna for Cellular Modules with Assisted GPS Hinged SMA(M)
Feature	:	Dipole Terminal Antenna Hinged SMA(M) Connector Length 168mm, Φ13mm AntD© Shunt 10k Ohm Chip Resistor Inside RoHS compliant

1. Introduction

The TG.10R Triton Dipole Antenna with AntD© Resistor – is primarily designed for use with CDMA modules with assisted GPS. It does not require a ground-plane to connect to. It has a quality robust PUS housing for use with wireless terminals. The antenna has a SMA(M) connector. It can be used straight or hinged 90 degrees. The antenna has a wide-band response and can also be used for other cellular and wireless applications such as GSM, LTE, UMTS, and WI-FI.

AntD© allows connected radio products using the latest cellular modules and recommended circuits from Telit and uBlox to perform diagnostics on the antenna. This includes detection that the proper antenna is connected and that the connection isn't shorted or broken. Contact Taoglas engineering for examples on how to implement AntD© antenna diagnostics in your product.
