

Size: 1.0in x 1.0in x 0.39in (25.4mm x 25.4mm x 9.9mm)

**OPTIONS**

- Negative Logic Remote On/Off
- Without Trim
- On/Off Pin
- Input Ranges
- Output Voltages

**FEATURES**

- Six-Sided Shielding
- High Efficiency up to 91%
- Fixed Switching Frequency
- 2:1 Wide Input Voltage Range
- 1600VDC Input to Output Isolation
- Compliant to RoHS II & Reach
- CE Marked
- Useful in a variety of applications
- Small Size and Low Profile: 1.0" x 1.0" x 0.39 inches
- Industry Standard Pin-Out DM Series Compatible
- Over Voltage, Over Load, and Short Circuit Protection
- UL60950-1, EN60950-1, & IEC60950-1 Safety Approvals
- CE Marked
- Positive/Negative Logic Remote On/Off, Without Trim, Without On/Off Pin options
- 9~18VDC, 18~36VDC, and 36~75VDC input ranges available

**APPLICATIONS**

- Measurement
- Telecom/Datacom
- Industry Control Systems
- Semiconductor Equipment
- Distributed Power Architects

**DESCRIPTION**

The JFC series of single and dual output DC/DC converters provide up to 15 watts of output power in an industry standard package and footprint. These units are specifically designed to meet power needs in a low profile package. All models feature a 2:1 wide input voltage range of 9~18VDC, 18~36VDC, or 36~75VDC. Some features include positive or negative remote on/off, 1600VDC I/O isolation, and trimmable output voltage. All models are protected against over current, input under voltage, over voltage, and short circuit conditions.

**NOTES**

- (1) Typical Value at Nominal Input Voltage and No Load.
- (2) Test by Minimum Vin and Constant Resistive Load.
- (3) Typical Value at Nominal Input Voltage and Full Load.
- (4) Trimming allows the user to increase or decrease the output voltage set point of the module. This is accomplished by connecting an external resistor between the Trim pin and either +Vout pin or -Vout pin.
- (5) The ON/OFF Control pin voltage is referenced to -Vin. (See the "Product Standard Table" below for suffix options)
- (6) For Heat Sink option add the suffix "HS" to the part number (Ex: JFC48S5-3000HS)(P/N: 7G-0047C-F). See attached for more details.
- (7) The JFC series can meet EN55022 Class A and Class B with external capacitors connected in parallel to the input pins. See attached for more details.
- (8) An external filter capacitor is required if the module has to meet EN61000-4-4 and EN61000-4-5. The filter capacitor suggested is Nippon chemicon KY series, 220µF/100V.

**Caution:** This power module is not internally fused. An input line fuse must always be used.

**OUTPUT VOLTAGE ADJUSTMENT**

Output voltage set point adjustment allows the user to increase or decrease the output voltage set point of the module. This is accomplished by connecting an external resistor between the TRIM pin and either the +OUTPUT or -OUTPUT pins. With an external resistor between the TRIM and -OUTPUT pin, the output voltage set point increases. With an external resistor between the TRIM and +OUTPUT pin, the output voltage set point decreases. The external TRIM resistor needs to be at least 1/16W or rated power.

Trim Up Equation

$$R_U = \left[ \frac{G \times L}{(V_{O,up} - L - K)} - H \right] \Omega$$

Trim Down Equation

$$R_D = \left[ \frac{(V_{o,down} - L) \times G}{(V_o - V_{o,down})} - H \right] \Omega$$

The power module should be connected to a low impedance input source. Highly inductive source impedance can affect the stability of the power module.

Install  $C_{SIM}$  and  $L_{SIM}$  to simulate the impedance of power source. External input capacitors  $C_{FILTER}$  serve primarily as energy-storage elements, minimizing line voltage variations caused by transient IR drops in conductors from backplane to the DC/DC. The capacitor must be as close as possible to the input terminals of the power module for lower impedance. For the input reflected-ripple current measurement configuration is shown as below:

COMPANY INFORMATION

Wall Industries, Inc. has created custom and modified units for over 50 years. Our in-house research and development engineers will provide a solution that exceeds your performance requirements on-time and on budget. Our ISO9001-2008 certification is just one example of our commitment to producing a high quality, well-documented product for our customers.

Our past projects demonstrate our commitment to you, our customer. Wall Industries, Inc. has a reputation for working closely with its customers to ensure each solution meets or exceeds form, fit and function requirements. We will continue to provide ongoing support for your project above and beyond the design and production phases. Give us a call today to discuss your future projects.
