

## SD05C Series 450W Discrete Bidirectional TVS Diode

### Description

The bidirectional SD05C TVS diode is designed to replace multilayer varistors (MLVs) in electronic equipment for low speed and DC applications. It will protect any sensitive equipment from damage due to electrostatic discharge (ESD) and other transient events.

The SD05C can safely absorb repetitive ESD strikes at  $\pm 30\text{kV}$  (contact discharge, IEC 61000-4-2) without performance degradation and safely dissipate 30A of 8/20 $\mu\text{s}$  induced surge current (IEC61000-4-5) with very low clamping voltages.
